Tools for High Performance Computing 2011 Holger Brunst, Matthias S. Müller, Wolfgang E. Nagel, Michael M. Resch, 2012-09-21 The proceedings of the 5th International Workshop on Parallel Tools for High Performance Computing provide an overview on supportive software tools and environments in the fields of System Management Parallel Debugging and Performance Analysis In the pursuit to maintain exponential growth for the performance of high performance computers the HPC community is currently targeting Exascale Systems The initial planning for Exascale already started when the first Petaflop system was delivered Many challenges need to be addressed to reach the necessary performance Scalability energy efficiency and fault tolerance need to be increased by orders of magnitude The goal can only be achieved when advanced hardware is combined with a suitable software stack In fact the importance of software is rapidly growing As a result many international projects focus on the necessary software

Heredity Explored Staffan Muller-Wille, Christina Brandt, 2016-07-29 Investigations of how the understanding of heredity developed in scientific medical agro industrial and political contexts of the late nineteenth and early twentieth centuries This book examines the wide range of scientific and social arenas in which the concept of inheritance gained relevance in the late nineteenth and early twentieth centuries Although genetics emerged as a scientific discipline during this period the idea of inheritance also played a role in a variety of medical agricultural industrial and political contexts The book which follows an earlier collection *Heredity Produced* covering the period 1500 to 1870 addresses heredity in national debates over identity kinship and reproduction biopolitical conceptions of heredity degeneration and gender agro industrial contexts for newly emerging genetic rationality heredity and medical research and the genealogical constructs and experimental systems of genetics that turned heredity into a representable and manipulable object Taken together the essays in *Heredity Explored* show that a history of heredity includes much more than the history of genetics and that knowledge of heredity was always more than the knowledge formulated as Mendelism It was the broader public discourse of heredity in all its contexts that made modern genetics possible Contributors Caroline Arni Christophe Bonneuil Christina Brandt Luis Campos Jean Paul Gaudilliere Bernd Gausemeier Jean Gayon Veronika Lipphardt Ilana Lwy J Andrew Mendelsohn Staffan Muller-Wille Diane B Paul Theodore M Porter Alain Pottage Hans Jorg Rheinberger Marsha L Richmond Helga Satzinger Judy Johns Schloegel Alexander von Schwerin Hamish G Spencer Ulrike Vedder

The Bush Leadership, the Power of Ideas, and the War on Terror Dirk Nabers, 2016-04-01 Foreign policy success or failure is often attributed to the role of leadership This volume explores the relationship between President George W Bush's leadership the administration's stated belief in the power of ideas and the ideas of power and its approach to the war on terror Drawing on the international expertise of ten American foreign policy and security specialists this incisive and timely book combines theoretical perspectives on political leadership with rigorous empirical analysis of selected aspects of the Bush administration's post 9 11 foreign policy As a result this book sheds

considerable light not just on the limited impact of President Bush's war on terror strategy but also more importantly on why key ideas underpinning the strategy such as US global primacy and pre-emptive war largely failed to gel in a globalizing world

The 1865 Stoneman's Raid Begins: Leave Nothing for the Rebellion to Stand Upon Joshua Beau Blackwell, 2011-05-06 Striking out from Knoxville Tennessee in late March of 1865 Major General George Stoneman unleashed his cavalry division upon Southern Appalachia intent on leaving nothing for the Rebellion to stand upon The raiders wreaked havoc on government stores civilian property and indispensable infrastructure dashing all hope for the dying Confederacy s stand on the rugged peaks of the Blue Ridge They eventually trampled through five southern states reduced to ashes one of the last major prisons in the south and helped pursue the renegade president But much more than wanton destruction their story is one of hardship redemption and retribution Taking into account the local folklore of the Raid this volume traces the column s course as it departed Tennessee penetrated Southwestern Virginia and stormed the North Carolina Piedmont

Informing with the Case Method T. Grandon Gill, 2011 There are a number of marvelous books that address the topic of the case method If you are interested in facilitating cases you can look to the classic book Teaching and the Case Method by Louis Barnes C Roland Christensen and Abby Hansen 1994 The collection of essays on the subject Education for Judgment The Artistry of Discussion Leadership by C Roland Christensen David Garvin and Ann Sweet 1991 is a wonderful and inspiring read as well If your interest is case based research it would be nearly impossible to find a more authoritative source than Robert Yin s 2009 4th Edition Case Study Research Design and Methods which at last count has been cited nearly 29 000 times according to Google Scholar There is even a new entry to the field William Ellet s 2007 The Case Study Handbook How to Read Discuss and Write Persuasively about Cases that is specifically aimed at the student At first glance then the topic of case studies in education and research seems to be pretty well covered Do we really need another book on the subject I write this book believing the answer is yes While I have great affection for the classics there are a number of issues facing most business faculty not to mention faculty members from disciplines outside of business that these books simply do not address In writing this book my intention is to offer some thoughts on some of these Paradoxically these omissions arise from the very fact that the authors of the classics are undisputed masters of their craft Why this is a problem should become clear as I identify the three areas of focus for this book The first issue that I feel must be considered is using the case method with a novice audience Consider the following When I was enrolled in the MBA program at Harvard Business School HBS in the early 1980s the curriculum consisted of nearly 900 case discussion 15 per week and perhaps as many as 20 class periods given over to lecture style presentations When I teach a case method graduate course at my own institution on the other hand I am constrained to 11

case discussions a 12 week semester As it happens I am also the only course in the entire program that employs pedagogy reasonably faithful to the case method as it is normally defined The math is very simple By the last day of my semester my students have as much experience discussing cases as I did on Thursday afternoon of the first week of my two year MBA program at HBS With the exception of faculty teaching at those rare institutions that have chosen to widely adopt the case method the situation I face is commonplace The second concern that existing books raise for me is their tendency to focus on isolated topics Specifically case facilitation case writing and case research are treated as separable activities I would argue that these three aspects of the case method which I define quite broadly are inseparable For institutions that wish to achieve the full set of benefits provided by the case method all three activities must be pursued in parallel Perhaps this is why so few institutions have achieved success through the case method In this book I will argue that achieving such integration is precisely why those rare institutions have been so successful Once you start believing that the case method can be a key to institutional success how you get there becomes a real challenge At leading institutions featuring the case method such as HBS the philosophy is largely learned through a period of apprenticeship For example I did not encounter any of the references mentioned in the first paragraph excepting Yin at any time during my 5 year doctorate at HBS Instead I went out and wrote cases facilitated discussions and did research under the guidance of faculty members who were masters of the craft How can someone without the benefit of such an experience acquire such mastery While I cannot offer any promises in this regard I will at least provide some examples and easy to follow checklists that may be of service to individuals getting started
