## Human Body System Interaction Review

**Why?** There are many organ systems in the body, each with a specific function. However, they do not work alone. The organ systems in the human body interact to perform the necessary functions for life. Through interactions, the body systems maintain internal balance or equilibrium known as homeostasis.

After food is broken down by chemical and mechanical digestion in the mouth, stomach and small intestine, absorption takes place. Nutrients are absorbed (taken up) from the small intestine into the blood stream of the circulatory system. The circulatory system transports the nutrients around the body for
