

Neuron Structure

What are the essential structures that make up a neuron?

Why?

Cells are specialized for different functions in multicellular organisms. In animals, one unique kind of cell helps organisms survive by collecting information and sending messages throughout the body. The shapes and features of neurons, which are the primary cells in the nervous system, enable animals to experience all of the five senses; find food, mates, and shelter; and to survive in their diverse environments.

Model 1 – Parts of a Neuron

1. Model 1 is an illustration of two neurons. Label one of the neurons in the diagram with the following structures:

Cell body or soma

Axon

Cell nucleus

Synapse

Dendrites

2. Which structure(s) on the neuron in Model 1 would receive a signal from either a sensory cell (taste bud, touch receptor, retinal cell) or from another neuron?

The structure that would signal from either a sensory cell to another neuron is the dendrites.

3. Draw an arrow through the two cells in Model 1 to show the path of a nerve impulse if a message was being sent through the two neurons.

Pogil Neuron Structure

Jiyuan Zhang

Pogil Neuron Structure:

Whispering the Techniques of Language: An Psychological Quest through **Pogil Neuron Structure**

In a digitally-driven world wherever displays reign great and immediate connection drowns out the subtleties of language, the profound strategies and psychological subtleties hidden within words usually go unheard. Yet, located within the pages of **Pogil Neuron Structure** a interesting fictional treasure blinking with fresh feelings, lies an extraordinary quest waiting to be undertaken. Written by a talented wordsmith, that marvelous opus invites viewers on an introspective trip, lightly unraveling the veiled truths and profound impact resonating within ab muscles fabric of each and every word.
