It is grounded in the research of cognitive behavior therapy CBT solution focused therapy SFT group work theory and wellness theory widely used and accepted by mental health clinicians     Rethinking the Curriculum Orlando Nang Kwok Ho, 2018-12-13 This book is an interdisciplinary endeavour. Encompassing education and basic research, it discusses the modular curriculum embodied in The Epistle from educational, historical, sociolinguistic, anthropological, phenomenological and non-sectarian perspectives. It shows the cross boundary philosophical reasoning and pedagogic dimensions of St Paul as a great teacher and thinker from the Jewish and Christian faith. In doing so, this book refocuses academia's attention on the inevitable antimononic nature inherent in humans' efforts to create systemic knowledge. Knowledge about the inner aesthetic and volitional interpretative self, the immanent psychic I and other philosophical aspects of the realm of the transcendental should be rescued from the deepening trends of secularity. Being strong, powerful, productive and performative should not be taken as the indisputable and exclusive aim of education. Science, Technology, Engineering and Mathematics (STEM) do not constitute a sufficient basis for building a better humanity. Education via public curriculums ought to serve both the belly and the mind. Deliberative curricular recalibrations with rationales for grace are thus needed for a better future for humanity. This book is relevant for anyone with a core fascination about truths, values, epistemologies, life, spirituality and holistic human development. It can also be used as a textbook or a reference in a number of fields including counselling psychology, translation, cultural studies and theology     *Addressing Violent Radicalisation and Extremism* Theo Gavrielides, 2025-05-02 This book adopts an interdisciplinary approach to confront one of the most urgent global challenges of our time: violent radicalisation and extremism. It critically examines how restorative justice, positive criminology and positive psychology intersect to address the behaviors and social conditions that foster extremism, offering a framework that reflects the complexities of our era. Grounded in a synthesis of philosophical inquiry, normative analysis and empirical evidence from six international pilot projects conducted between 2017 and 2024, the volume navigates the shifting boundaries between punitive and preventive approaches. It explores the potential of community based initiatives to foster understanding, empathy and empowerment as

means to reduce violence and promote reconciliation Through a focus on the psychological and social roots of extremism the book delves into the restorative capacity of justice systems to mend fractured communities and the role of positive psychological interventions in reshaping harmful behaviors In doing so it bridges theoretical advancements with actionable strategies for policymakers practitioners and researchers seeking alternatives to traditional punitive models This collection reflects the depth and breadth of contemporary scholarship in counter extremism offering perspectives from established experts and emerging voices It serves as a vital resource for those engaged in fields such as social work human rights conflict resolution and criminology contributing fresh insights and practical tools to prevent and mitigate radicalisation This book offers a refreshing and holistic perspective on one of the most pressing global issues today violent extremism By integrating restorative justice principles with a psychosocial approach the book moves beyond punitive measures and focuses on healing rehabilitation and the reintegration of individuals into society This book is a thought provoking and important contribution to the discourse on counter extremism Professor Clarence Augustus Martin California State University USA This book is not only a source of knowledge but also a significant advancement in the evolution of thought offering tangible pathways for action Through a genuinely interdisciplinary approach and case studies Theo Gavrielides presents the scientific community with a work where science becomes a lens through which reality can be understood and reshaped Professor Grazia Manmozzi University of Insubria Italy
