New England Tree Guide:

Trees of New England Dan Ogrzydziak, 2013-06-23 The main body of *Trees of New England* consists of 19 ink drawings of trees common to the Pioneer Valley of Massachusetts southern Vermont and southern New Hampshire My motivation came from the lack of leaf images with sufficient quality to do key driven tree identification The use of leaf keys is a means to train the eye for details relevant to distinguishing species well beyond the 19 found in this book In general detail found in commercial field guides is limited and the higher quality older etchings are difficult to find and ornate in style It might seem that this need could be fully realized through the Internet but for learning tree identification by key the Internet has its own limitation Each of the 19 drawings is an attempt to produce a realistic image with a focus on identifiable features All the images were produced from multiple samples with an eye to capturing an archetypal representation of the species The aesthetic was to create a precise unembellished series of drawings in which the beauty of nature s designs would be manifest

Thoreau and the Language of Trees Richard Higgins, 2017-04-04 Trees were central to Henry David Thoreau's creativity as a writer his work as a naturalist his thought and his inner life His portraits of them were so perfect it was as if he could see the sap flowing beneath their bark When Thoreau wrote that the poet loves the pine tree as his own shadow in the air he was speaking about himself In short he spoke their language In this original book Richard Higgins explores Thoreau's deep connections to trees his keen perception of them the joy they gave him the poetry he saw in them his philosophical view of them and how they fed his soul His lively essays show that trees were a thread connecting all parts of Thoreau's being heart mind and spirit Included are one hundred

excerpts from Thoreau's writings about trees paired with over sixty of the author's photographs Thoreau's words are as vivid now as they were in 1890 when an English naturalist wrote that he was unusually able to preserve the flashing forest colors in unfading light Thoreau and the Language of Trees shows that Thoreau with uncanny foresight believed trees were essential to the preservation of the world
