contributors from well known children's units. They are not simply adaptations from adult practices and therefore recognise the unique differences between adult and children's nursing. The introductory section covers common concepts and infection control. There is also a chapter on complementary therapies and an appendix on the use of play as a distraction. All hospital and community nurses dealing with children whether at home in specialised units or in community settings will find the book of great practical help. The common format of each practice makes the book easy to use and refer to in a clinical setting. Each practice is based on the latest research to ensure it is evidence based and up to date. Introductory chapters cover issues common to all practices to make the book easier to use. The appendix on play reinforces its common usage as a distraction technique. A chapter on complementary therapies explains these as they are becoming more widespread. All practices have been reviewed by regional centres to avoid parochialism. Content reorganised to reflect the Essential Skills Clusters from the NMC. New chapter on communicating with children. All chapters updated to reflect the current evidence base.
