

HEADER LIFT TRANSPORT STOPS

DANGER: ALWAYS ENGAGE THE TRANSPORT STOPS WHEN WORKING AROUND A RAISED HEADER OR WHEN TRANSPORTING THE MACHINE ON A PUBLIC ROAD.

To engage the transport stops, pivot both right and left lock levers, 1, forward. If the machine was raised first the lock rods, 2, should move forward under the stop blocks, 3. If the machine was not raised first simply raise the unit with the tractor hydraulics and the locks will engage. Lower the header onto the stops.

To disengage the header lift locks, pivot both left and right lock levers, 1, rearward. If the machine was raised first the lock rods, 2, should move rearward. If the machine was not raised first simply raise the unit with the tractor hydraulics and the locks will release.

NOTE: If the cylinders do not extend far enough to release the transport stops, there may be air in the hydraulic system that must be purged. Refer to "Bleeding Air From The Lift Cylinders" in this section.

ATTENTION: Always engage or disengage both header lift locks at a time. Lowering the unit with one stop engaged could cause damage to the unit.

TRANSPORTING THE MOWER-CONDITIONER

SAFETY CHAIN

The optional safety chain, 1, should be used when towing the mower-conditioner on a public road. The safety chain is intended to keep the machine under control in the event of loss or failure of the hitch pin.
