Global Anti-Money Laundering Regulation Nkechikwu Azinge-Egbiri, Nicholas Ryder, Ehi Eric Esoimeme, 2024-11-25. This book explores the politics of money laundering and terrorist financing. ML/TF regulation in several countries across Africa and the Small Island States. Developed countries created the Financial Action Task Force (FATF) to combat ML/TF globally. Expectedly, the FATF's standards mirror existing banking regulations within the G7 countries. Yet the standards apply to all countries irrespective of the limited ML/TF risks they pose to the global economy; their weak pre-conditions for effective regulation and their non-involvement in the FATF's framing. Still, such countries, mainly within the Global South, have worked hard to amplify their compliance with the regime due to fears of the repercussions of their non-compliance. This collection demonstrates how the global ML/TF regulation is treated as an implicitly superior legal regime where the Global South must comply irrespective of their perception of the FATF's legitimacy challenges. It shows that beyond exogenous factors such as neo-colonialism, endogenous factors such as weak institutions and corruption undermine the compliance trajectory of the Global South. Furthermore, it analyses the unintended consequences of transplanting FATF standards into diverse legal and cultural contexts. The volume contributes to our understanding of the challenges of transplantation from the Global North and how the Global South is steering within the constraints created by the FATF. It advocates for a comprehensive understanding of the nuanced compliance challenges of developing countries. It further proposes practical solutions to address them.

emphasizing the importance of risk based understanding accountability capacity building and coordination in achieving effective anti money laundering and counter terrorist financing measures The collection will be essential reading for researchers academics and policy makers working in financial crime regulation and international economic law Global Child Myriam Denov, Claudia Mitchell, Marjorie Rabiau, 2023-01-13 Armed conflicts continue to wreak havoc on children and families around the world with profound effects In 2017 420 million children nearly one in five were living in conflict affected areas an increase in 30 million from the previous year The recent surge in war induced migration referred to as a global refugee crisis has made migration a highly politicized issue with refugee populations and host countries facing unique challenges We know from research related to asylum seeking families that it is vital to think about children and families in relation to what it means to stay together what it means for parents to be separated from their children and the kinds of everyday tensions that emerge in living in dangerous insecure and precarious circumstances In Global Child the authors draw on what they have learned through their collaborative undertakings and highlight the unique features of participatory arts based and socio ecological approaches to studying war affected children and families demonstrating the collective strength as well as the limitations and ethical implications of such research Building on work across the Global South and the Global North this book aims to deepen an understanding of their tri pillared approach and the potential of this methodology for contributing to improved practices in working with war affected children and their families **Research Anthology on**
