Beauty has never before been the object of scientific study nor has its evolution. Gaietto has integrated human products including art into the general evolution of beauty in nature, noting that man's objects follow the same rules of evolutionary transformation found in organic and inorganic physical forms. Gaietto's hypothesis on the transformation of beauty concerns all the kingdoms of nature as they have appeared in chronological order from the earliest geological ages and as discovered by geologists, paleontologists, and paleontologists. The book's scientific analysis of beauty in human artifacts excludes questions of quality even if they exist as well as the idea of ugliness because man intentionally produces only beautiful things. *Making Sure of Arithmetic* Robert Lee Morton, 1955 **American Journal of Ophthalmology**, 1926 **Discovering Cones** Nancy Furstinger, 2016-08-01 The flat bottom of a cone is called a base.
