Oceans Environmental Issues Global Perspectives:

Oceans James Fargo Balliett, 2010 Covering 71 percent of the planet oceans provided the unique environmental conditions necessary for the building blocks of life to form billions of years ago and continue to support life in important ways today they are home to nearly 50% of all species on earth they influence climate and weather patterns they provide food and water for humankind Yet they are being threatened by human activity and natural disasters The case studies in Oceans include a discussion of the most remote locations along the Mid Atlantic Ridge where new ocean floor is being formed underwater the Maldive Islands where rising sea levels may force residents to abandon their communities and the North Sea where fishing stocks have been dangerously depleted as a result of multiple nations unrelenting removal of certain species

Freshwater James Fargo Balliett, 2014-12-18 Freshwater is our planet's most precious resource and also the least conserved Freshwater makes up only 3 percent of the total water on the planet and yet the majority 1.9 percent is held in a frozen state in glaciers icebergs and polar ice fields This leaves approximately one half of 1 percent of the total volume of water on the planet as freshwater available in liquid form This book traces the complex history of the steady growth of humankind's water consumption which today reaches some 9.7 quadrillion gallons per year Along with a larger population has come the need for more drinking water larger farms requiring extensive irrigation and more freshwater to support business and industry At the same time such developments have led to increased water pollution Three detailed case studies are included The first looks at massive water systems in locations such as New York City and the efforts required to protect and transport such resources The second shows how growth has affected freshwater quality in the ecologically unique and geographically isolated Lake Baikal region of eastern Russia The third examines the success story of the privatized freshwater system in Chile and consider how that country's water sources are threatened by climate change

Oceans

James Fargo Balliett, 2014-12-18 Covering 71 percent of the planet these saline bodies of water provided the unique conditions necessary for the building blocks of life to form billions of years ago This book explains how our oceans continue to support and influence life in important ways by providing the largest global source of protein in the form of fish populations by creating and influencing weather systems and by absorbing waste streams such as airborne carbon It is shown how oceans have an almost magnetic draw almost half of the world's population lives within a few hours of an ocean Although oceans are vast in size exceeding 328 million cubic miles 1.37 billion cubic kilometers they have been influenced by and have influenced humans in numerous ways The book includes three detailed case studies The first focuses on the most remote locations along the Mid Atlantic Ridge where new ocean floor is being formed twenty thousand feet underwater The second considers the Maldives a string of islands in the Indian Ocean where increasing sea levels may force residents to abandon some communities by 2020 The third describes the North Sea at the edge of the Arctic Ocean where fishing stocks have been dangerously depleted as a result of multiple nations unrelenting removal of the smallest and largest species

Governmental Response to Environmental Challenges in Global Perspective Joseph G. Jabbara, O. P. Dwivedi, 1998

In our drive to improve human standards of living we have paradoxically paid scant attention to the need for clean air and water the impact of acid rain on agriculture lakes and rivers the effect of pollutants on the ozone layer the safe disposal of hazardous wastes and the relationship between population growth and the environment It seems that every time governments are faced with an apparent choice between economic development and the protection of the environment priority is always given to the former Short term plans dictated by canons of political survival and expediency always seem to take precedence over long term strategies with politicians and decision makers deftly relegating environmental concerns to the realm of rhetoric This book is an effort to better understand the problems faced by our global ecosystems It is also the result of the authors deep commitment to urge both citizens and their leaders the world over to work together for a better protection of the environment so that our planet may be saved for the present and for future generations Examining Energy and the Environment around the World Bruce E. Johansen, 2019-04-01 This volume addresses ten issues pertaining to energy and the environment such as climate change fossil fuels endangered species and renewable energy and examines how these issues are affecting countries around the world In the industrial age first powered by coal and then more often by oil environmental degradation nearly inevitably followed resource exploitation and energy production This book examines environmental issues in specific countries around the world as well as solutions some of these countries have discovered in order to help save the environment This volume includes 10 chapters each addressing a specific issue relating to energy and the environment as it pertains to a variety of countries including toxic chemicals pollution deforestation and climate change Each chapter begins with an introduction to the issue Following the chapter introduction each chapter highlights that issue in eight countries and provides historic perspective This work provides an overview for high school students and college students at the undergraduate level on 10 important topics that address matters relating to energy and the environment in the 21st century Global Perspectives on Climate Change, Inequality, and Multinational Corporations João Bento, Miguel M. Torres, 2025-04-16 Comprising a collection of selected research papers this book discusses the challenges related to climate change mitigation and adaptation It adds valuable insights into the link between climate change global inequality and multinational corporations Bringing together an international range of prominent authors this book interests academics students and practitioners It serves as a valuable guide for policymakers in environmental sustainability This book encourages researchers to think more broadly about the implications of multinational corporations concerning global inequality and climate change It deepens understanding of how foreign direct investments can contribute to a more sustainable future and overcome environmental challenges **Role of Oceans in Global Climate Change** United States. Congress. Senate. Committee on Energy and Natural Resources, 1994 **Review of the State of World Marine Fishery Resources** Food and Agriculture Organization of the United Nations. Marine Resources Service, 1994-01-01 This document

provides a review commentary and tabulations of the main trends that have occurred in exploitation of fisheries resources since the 1970s largely as they are reflected in the FAO database on fishery landings supplemented with selected information from the fishery literature Reviews were prepared separately for the 15 main areas into which FAO divides the world's oceans for statistical purposes They are then compared from a global perspective to reveal relative trends by species and areas which are highlighted Several special topics are reviewed including tuna and tuna like species whales and dolphins and environmental issues in fisheries

Professional and Business Ethics Through Film Jadranka Skorin-Kapov, 2018-08-10 This book considers ethical issues arising in professional and business settings and the role of individuals making decisions and coping with moral dilemmas Readers can benefit from engagement in filmic narratives as a simulated environment for developing a stance towards ethical challenges The book starts by elaborating on critical thinking and on normative ethical theories subsequently presenting the structure and cinematic elements of narrative film These two avenues are tools for evaluating films and for discussions on various ethical problems in contemporary business including the corporate and banking financial machinations greed fraud social responsibility workplace ethical challenges harassment violence inequity inequality professional and business ethical challenges corruption whistleblowing outsourcing downsizing competition and innovation environmental and social issues international business and human rights and personal responsibility and identity challenges due to career pressures loss of privacy and cyber harassment and job structure changes in light of changing technology

The Oceans and the Environment DIANE Publishing Company, 1994-04 Proceedings of a conference for representatives of the Pacific Islands community to discuss the threat of global warming and sea level rise waste disposal ozone depletion marine resource management endangered species protection and the many other pressing environmental issues of our time

The Global Casino Nick Middleton, 2013-07-18 The Global Casino is an introduction to environmental issues which deals both with the workings of the physical environment and the political economic and social frameworks in which the issues occur Using examples from all over the world the book highlights the underlying causes behind environmental problems the human actions which have made them issues and the hopes for solutions It is a book about the human impact on the environment and the ways in which the natural environment impacts human society The fifth edition has been fully revised and updated throughout with new case studies figures and online resources such as downloadable figures and tables from the text and multiple choice questions for students accessible at www.routledge.com/cw/middleton New topics covered in extended boxed case studies include payment for environmental services ocean acidification biofuels in Brazil waste reduction through industrial symbiosis and the long term impact of natural disasters on vulnerable groups Other approaches and concepts covered for the first time in this new edition include traditional ecological knowledge environmental justice the resource curse and urban biodiversity Eighteen chapters on key issues follow three initial chapters which outline the background contexts of the physical and human environments and the concept of sustainable development

Each chapter provides historical context for key issues outlines why they have arisen and highlights areas of controversy and uncertainty to appraise how issues can be resolved both technically and in political and economic frameworks Each chapter also contains an updated critical guide to further reading and websites as well as discussion points and essay questions The text can be read in its entirety or individual chapters adopted as standalone reading The Global Casino is an essential resource for students of the environment geography earth sciences and development studies It provides comprehensive and inspirational coverage of all the major global environmental issues of the day in a style that is clear and critical

Vessel-Source Marine Pollution Alan Khee-Jin Tan, 2005-12-22 Analysing the regulation of vessel source pollution from the perspective of the political interests of key players in the ship transportation industry this 2005 book by Alan Khee Jin Tan offers a comprehensive and convincing account of how pollution of the marine environment by ships may be better regulated and reduced In this timely study he traces the history of regulation at the International Maritime Organization IMO and investigates the political economic and social forces influencing the IMO treaties Also examined are the efforts of maritime states ship owners cargo owners oil companies and environmental groups to influence IMO laws and treaties This is an important book which uncovers the politics behind the law and offers solutions for overcoming the deficiencies in the regulatory system It will be of great interest to professionals in the shipping industry as well as practitioners and students

Atlantic and Indian Oceans Environment Outlook Sherry Heileman, E. Z. Laisi, Clarice Wilson, United Nations Environment Programme, Centre for Development Research and Information in Southern Africa, 2005 Special edition for the Mauritius International Meeting for the 10 year Review of the Barbados Programme of Action for the Sustainable Development of Small Island Developing States

Radioactive Waste Disposal at Sea Lasse Ringius, 2000-11-20 Most studies of environmental regimes focus on the use of power the pursuit of rational self interest and the influence of scientific knowledge Lasse Ringius focuses instead on the influence of public ideas and policy entrepreneurs He shows how transnational coalitions of policy entrepreneurs can build environmental regimes and how global environmental nongovernmental organizations can act as catalysts for regime change This is the first book length empirical study of the formation of the global ocean dumping regime in 1972 and its subsequent development which culminated in the 1993 global ban on the dumping of low level radioactive waste at sea Ringius describes the structure within which global ocean dumping policy particularly policy with regard to the disposal of radioactive waste is embedded He also examines the political construction of ocean dumping as a global environmental problem the role of persuasion and communication in an international setting and the formation of international public opinion He does not argue that the influence of ideas alone explains how regimes develop but claims that it is necessary to understand how actors interests and ideas together influence regimes and international environmental policy

Interactions of Land, Ocean and Humans Chris Maser, 2014-10-14 Written by Chris Maser one of the architects of the sustainability movement *Interactions of Land Ocean and Humans A Global Perspective* explores a critical number of the

myriad aspects that comprise the great reciprocal feedback loops between the mountain peaks the deep sea and everywhere in between Maser's exploration of these connections gives us the tools required to open our imaginations and our scientific literacy offering insights into the relationships between the land sea and people that could influence us toward better decisions The author examines the hydrological cycle hydrological continuum and anthropogenic pollution of various kinds from the atmosphere to deep belowground He also highlights connections by detailing how human behavior changes the atmosphere which changes the oceans which alters the climate which alters the atmosphere and thus the ocean and so on The book then explores the biophysical commonalities between landscapes and seascapes as well as the habitats in each realm It covers marine fisheries marine protected areas oceans as a commodity as part of the global commons as a biophysical living trust for which we are the trustees and the children of today and beyond are the beneficiaries and more Can we arrest this deleterious process Yes but it will take a dramatic shift in human behavior worldwide Why Because just as the collective human behavior and lack of awareness caused the problems in the first place the level of consciousness that caused the problem is not the level of consciousness that can fix it We must shift our thinking from that which is symptomatic to that which is systemic if we are to have a sustainably productive environment through time Maser gives us the understanding of the biophysical interactions among the lands oceans and peoples of the world needed to create sustainable solutions to environmental problems

The IMLI Treatise On Global Ocean Governance David Joseph Attard, David M Ong, Dino Kritsiotis, 2018-07-04 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically With seemingly no opportunity for revision due to the Convention's burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans This volume focuses on the role of UN as the central intergovernmental organization responsible for global ocean governance It examines the ocean governance challenges and how the present legal policy and institutional frameworks of the UN have addressed these challenges It identifies the strengths and weaknesses of UN legal structures and offers tangible proposals to realize the ambition of a global ocean governance system

[Order for the Oceans at the Turn of the Century](#) Davor Vidas, Willy Østreng, 2024-01-08 This book is a state of the art report on ocean law and politics today written by 40 contributors from six continents At this important early stage of implementation of the Law of the Sea Convention this book assesses where we have been going in the past decade and charts the way ahead

Implementation of the Convention from the perspective of interaction of politics and law is the unifying theme of the book Under this three basic aspects have emerged as crucial during the 1990s 1 evolution of new regimes 2 institutionalisation and 3 new patterns of participation These are explored systematically in sections on the Convention its implementing agreements and related international institutions Parts I and II interaction of law of the sea with other regimes including those for polar regions Parts III and IV the various levels international national and transnational and actors involved in the implementation of the Convention Part V and a number of salient issues in implementation today Part VI *Advances in Marine Environmental Protection: Challenges, Solutions and Perspectives* Mehran Idris Khan, Yen-Chiang Chang, Wen-Hong Liu, 2025-04-29

Environments have no boundaries and no borders Managing oceanic environments particularly the threats and risks of pollution should also consider the shared responsibility of all coastal states Emerging issues for oceanic pollution governance include global changes like rising temperature ocean acidification but also disturbances of ecosystem functioning by plastic and pollution by other emerging contaminants for example noise pollution and deep sea mining These call for efficient and sustainable prevention and restoration strategies such as such as efficient urban and industrial sewage treatment plants efficiently administered transnational marine protected areas and among others sustainable aquaculture extensive small scale fisheries Environmental protection warrants the development of interrelationships between marine sciences relevant industries and ocean governance developing internationally accepted rules and regulations for sustainable ocean management This Research Topic will explore possible new domains of ocean governance and the marine environment from the interdisciplinary perspectives of the rule of law including the international agreement on equal conventions the Convention on Facilitation of International Maritime Traffic the Convention on the International Regulation for Preventing Collisions at Sea and International Convention for the Prevention of Pollution from Ships MARPOL **Ocean Pollution** Carl J. Sindermann, 1995-11-21 Ocean Pollution provides a unique look at the effects of estuarine and coastal pollution on resource species One of the primary objectives of the book is to provide an accurate assessment of the state of the inshore marine environment and its inhabitants *Africa Environment Outlook 2* United Nations Environment Programme, 2006 This is the second comprehensive report on the state of Africa s environment produced in collaboration with the African Ministerial Conference on the Environment AMCEN This report highlights the central position Africa s environment continues to play in sustainable development as well as its potential to achieve progress in the implementation of the Millennium Development Goals The report profiles Africa s environmental resources as an asset for the continent s development It highlights the opportunities presented by the region s natural resource base to support the continent s development It also underscores the concept of sustainable livelihoods and the importance of the environmental initiatives in supporting them
