Educating Everybody's Children Robert W. Cole W. Cole, 2008-06-15 Designed to promote reflection, discussion, and action among the entire learning community, *Educating Everybody's Children* encapsulates what research has revealed about successfully addressing the needs of students from economically, ethnically, culturally, and linguistically diverse groups and identifies a wide range of effective principles and instructional strategies. Although good teaching works well with all students, educators must develop an extensive repertoire of instructional tools to meet the varying needs of students from diverse backgrounds. Those tools and the knowledge base behind them are the foundation of this expanded and revised second edition of *Educating Everybody's Children*. Each strategy discussed in the book includes classroom examples and a list of the research studies that support it. The most important thing we have learned as a result of the education reform movement is that student achievement stands or falls on the motivation and skills of teachers. We must ensure that all teachers are capable of delivering a standards-based curriculum that describes what students should know and be able to do and that these standards are delivered by means of a rich and engaging pedagogy of plenty. By these two acts, we can ensure that all schools will be ready and able to educate everybody's children.

Gradwell, 2010-07-16 In the case studies that make up the bulk of this book middle and high school history teachers describe the decisions and plans and the problems and possibilities they encountered as they ratcheted up their instruction through the use of big ideas Framing a teaching unit around a question such as Why don't we know anything about Africa offers both teacher and students opportunities to explore historical actors ideas and events in ways both rich and engaging Such an approach exemplifies the construct of ambitious teaching whereby teachers demonstrate their ability to marry their deep knowledge of subject matter students and the school context in ways that fundamentally challenge the claim that history is boring
