Reframing Police Education and Freedom in America Martin Alan Greenberg, Beth Allen Easterling, 2023-09-15 This book untangles the components of police education and advocates a robust community based training model with significant civilian oversight The recommended approach recognizes that the citizenry needs to be included in the provision of basic police education for it is they who must both support and be served by their police The police must be role models for society demonstrating that freedom and rights come with obligations both to the community as a whole and to individuals in need within that community Ultimately the quality of police training and the

public safety depend not only on the leadership of police executives as well as the quality of educational institutions and police candidates but also on the building of a community's trust in its police. The issues of police recruitment, education, and retention have greater consequence in an era when protests and other signs of negativity surround law enforcement. Several incidents including most notably George Floyd's murder by police have sparked new training initiatives regarding police de-escalation and community engagement. At the same time, the proliferation of gun violence and a contentious political climate have led some officers to refrain from undertaking proactive types of policing. In this context, reform of the police education system is urgent. This book examines police training at all levels of government: local, regional, state, and federal. In addition, citizen participation programs including the role of the media and programs for furthering law-related education (LRE) are highlighted. The proposed police education model recognizes that ordinary members of the American public need to contribute to the provision of basic police education for it is they who must both support and be served by their police. The focus is on teaching a guardian style of policing at the local level. Police education would combine higher education, necessary practical proficiencies, and intensive field experiences through a gradual level of greater responsibility, likely extending over a 2-plus-year period for trainees with less than a year of previous college credits. This book will be of interest to a wide range of audiences such as law enforcement professionals and trainers, including those in executive development programs in police departments, community leaders, scholars, and policy experts who specialize in policing, concerned citizens, and students of criminal justice, especially those interested in police organization and management, criminal justice policy, and the historical development of police.

Library, 1960 **The Performative State** Iza Yue Ding, 2022-09-15 What does the state do when public expectations exceed its governing capacity? The Performative State shows how the state can shape public perceptions and defuse crises through the theatrical deployment of language, symbols, and gestures of good governance. Performative governance, Iza Ding unpacks the black box of street-level bureaucracy in China through ethnographic participation in depth interviews and public opinion surveys. She demonstrates in vivid detail how China's environmental bureaucrats deal with intense public scrutiny over pollution when they lack the authority to actually improve the physical environment. They assuage public outrage by appearing responsive, benevolent, and humble. But performative governance is hard work. Environmental bureaucrats paradoxically work themselves to exhaustion even when they cannot effectively implement environmental policies. Instead of achieving performance legitimacy by delivering material improvements, the state can shape public opinion through the theatrical performance of goodwill and sincere effort. The Performative State also explains when

performative governance fails at impressing its audience and when governance becomes less performative and more substantive Ding focuses on Chinese evidence but her theory travels comparisons with Vietnam and the United States show that all states democratic and authoritarian alike engage in performative governance
