Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Steve N. Fiering ,Robert Ivkov,2020-12-16 The collection is diverse in the topics covered as well as the contributors who come from across the globe The overall topic is inherently a complex one since it integrates the exceptional complexity of cancer biology and treatment with the large and rapidly growing number of potential nanostructures and modifications that could be applied to treatment In both cancer and nanotechnology a very small change of a relevant variable can generate exceptional variability in biological outcome creating inherent challenges to clinical adoption As with many high potential fields in medicine the recognition of exceptional potential for nanotechnology in cancer therapy with associated expectations of rapid clinical impact has been followed by disappointingly slow progress that highlights not failure but rather unrealistic expectations for rapid progress We have passed that period of expected rapid clinical impact for nanoparticle treatment of cancer and are now well entrenched in the more realistic phase of exploiting the easiest applications in this case packaging of established chemotherapy drugs while carefully studying the exceptional numbers of relevant variables that must be evaluated for efficacy and safety of innovative strategies Although never as rapid as hoped the progress is clear and clinical impact is growing **Advances in Organic Corrosion Inhibitors and Protective Coatings** Ioannis

Kartsonakis,2021-09-01 The interaction of metal with its environment that results in its chemical alteration is called metallic corrosion According to the literature corrosion is classified to two types uniform and localized corrosion Intervention in either in the alloy environment or in the alloy structure can provide the corrosion protection of metallic materials Furthermore the interference in the metal alloy environment can be conducted with the utilization of cathodic or anodic protection via the corresponding inhibitors Therefore the most common categorization is cathodic anodic and mixed type inhibitors taking into account which half reaction they suppress during corrosion phenomena The majority of the organic inhibitors are of mixed type and perform through chemisorption In order to update the field of the corrosion protection of metal and metal alloys with the use of organic inhibitors a Special Issue entitled Advances in Organic Corrosion Inhibitors and Protective Coatings is introduced This book gathers and reviews a collection of ten contributions nine articles and one review from authors from Europe Asia and Africa that were accepted for publication in this Special Issue of Applied Sciences
