Tender Evaluated by: Krishneel Prasad (UL-SSP)
Tender Evaluation Approved by: Om Dutt Sharma (GM-SPC)
Recommended Bidder: ETEL Limited
Tender Amount (NZD): \$114,640.00
Tender Amount (FJD): \$172,106.29

Comments:

Upon tender evaluation, it is recommended that all the required criteria's are satisfied by three bidders namely, Zennaroetrafo, ETEL Limited and Tyree Transformers. The lowest bid is by Zennaroetrafo from Italy. After reviewing the evaluation report, it is recommended to award the tender to ETEL. This is because Zennaroetrafo has never supplied transformers to FEA before and would require an inspection of Zennaroetrafo's production plant. ETEL is the second lowest bidder and is the current supplier of distribution transformers to FEA and has been supplying transformers to FEA for the past 10 years.

Note: The procurement of 2x2MVA transformers is for MHCC Upgrade Project. The tender will be awarded to ETEL upon receipt of full payment for the project from the Carpenters Group.

Rippling is a radically new technique for the automation of mathematical reasoning. It is widely applicable whenever a goal is to be proved from one or more syntactically similar givens. It was originally developed for inductive proofs where the goal was the induction conclusion and the givens were the induction hypotheses. It has proved to be applicable to a much wider class of tasks from summing series via analysis to general equational reasoning. The application to induction has especially important practical implications in the building of dependable IT systems and provides solutions to issues such as the problem of combinatorial explosion. Rippling is the first of many new search control techniques based on formula annotation; some additional annotated reasoning techniques are also described here. This systematic and comprehensive introduction to rippling and to the wider subject of automated inductive theorem proving will be welcomed by researchers and graduate students alike. Computational Logic: Logic Programming and Beyond Antonis C. Kakas, Fariba Sadri, 2003-08-02 Alan Robinson
This set of essays pays tribute to Bob Kowalski on his 60th birthday, an anniversary which gives his friends and colleagues an excuse to celebrate his career as an original thinker, a charismatic communicator and a forceful intellectual leader. The logic programming community hereby and herein conveys its respect and thanks to him for his pivotal role in creating and fostering the conceptual paradigm which is its *raison d'être*. The diversity of interests covered here reflects the variety of Bob's concerns. Read on! It is an intellectual feast. Before you begin, permit me to send him a brief personal but public message: Bob, how right you were and how wrong I was, I should explain. When Bob arrived in Edinburgh in 1967, resolution was as yet fairly new, having taken several years to become at all widely known. Research groups to investigate various aspects of resolution sprang up at several institutions, the one organized by Bernard Meltzer at Edinburgh University being among the first. For the half-dozen years that Bob was a leading member of Bernard's group, I was a frequent visitor to it and I saw a lot of him. We had many discussions about logic computation and language.
