A reflective original invitation to recover and cultivate the human experiences that have atrophied in our virtual world. We embraced the mediated life from Facetune and Venmo to meme culture and the Metaverse because these technologies offer novelty and convenience. But they also transform our sense of self and warp the boundaries between virtual and real. What are the costs? Who are we in a disembodied world? In *The Extinction of Experience*, Christine Rosen investigates the cultural and emotional shifts that accompany our embrace of technology. In warm philosophical prose, Rosen reveals key human experiences at risk of going extinct, including face-to-face communication, sense of place, authentic emotion, and even boredom. Considering cultural trends like TikTok challenges and mukbang, and politically unsettling phenomena like sociometric trackers and online conspiracy culture, Rosen exposes an unprecedented shift in the human condition, one that habituates us to alienation and control. To recover our humanity and come back to the real world, we must reclaim serendipity, community, patience, and risk. *Borderless Education as a Challenge in the 5.0 Society* Ade Gafar Abdullah, Vina Adriany, Cep Ubad Abdullah, 2020-10-21 These proceedings contain a selection of papers presented at the 3rd International Conference on Educational Sciences, organized on 16 November 2019. It covers themes such as philosophy and policy of teacher education, curriculum, teaching and learning approaches, learner's characteristics in the digital era, global citizenship education, vocational education, teacher education, qualification framework, management, supervision, and assessment, lifelong learning for all, diversity in education, equality of educational opportunity, vocational and entrepreneurship education, and education in the industry 4.0 era.
