Universal Remote Control Owner's Manual

Manual del Propietario (parte posterior)

SAVE THIS MANUAL AND THE CODE LISTS!

Remote controls can sometimes lose their programming when you change the batteries. Make sure you keep the manual and code lists in a safe place so that you can reprogram the remote if you need to.

Tip: This remote is already programmed to operate most RCA-branded TVs, DVD players, and satellite receivers. Just press the corresponding key—DVD/VCR for a DVD player, TV for a television, SAT+CSL-DTC for a satellite receiver.

Step 1: Install your batteries

Our universal remote requires two AAA alkaline batteries (not included).

To install the batteries:

1. Remove the battery compartment cover.
2. Insert the batteries, matching the batteries to the (+) and (-) marks inside the battery compartment.
3. Push the battery cover back into place.

Battery Precautions:

- Do not mix old and new batteries.
- Do not mix alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium) batteries.
- Always remove old, weak or worn-out batteries promptly and recycle or dispose of them in accordance with Local and National Regulations.

Battery Saver

Our universal remote control saves battery power by automatically turning off if any key is pressed for more than 50 seconds. This saves your battery life should your remote get stuck in a place where the keys remain depressed, such as between sofa cushions.

Step 2: Program your remote

To use this universal remote with your home entertainment system, first you need to program it to control your devices. There are four ways you can program the universal remote to operate your devices:

- The **Auto Code Search** goes automatically through all the codes for the device you're trying to control. It's the easiest method, but it can sometimes take longer than some of the other programming methods.
- The **Brand Code Search** searches through the codes for select brands of devices. It's not as easy as the auto code search, but it can be faster.
- The **Direct Code Entry** lets you enter a code from the accompanying code list for your brand of device. It's not as easy as the other methods, but it's potentially the fastest method.
- The **Manual Code Search** lets you manually go through all the codes for the device you're trying to control.

Auto Code Search

The Auto Code Search goes automatically through all the codes for the device you're trying to control. When you find the one that operates your device, you can stop the search and store that code.

TIPS: Each device key is associated with a type of device—the TV is preset to search for TVs, SAT+CSL-DTC for satellite receivers, cable boxes or digital TV converters, DVD/VCR for DVD players, and DVR+AUX for DVRs. To program a device key for a different type of device, see the Changing a Key's Device Type section.

To exit without saving a new code at any point in the Auto Code Search, press the **EXIT** key.

1. Manually turn on the device you want to control.
2. Press and hold the device key you want to program. The **POWER** key illuminates.

While you're holding down the device key, use your other hand to press and hold the remote's **POWER** key at the same time. The **POWER** key turns off.

3. Wait until the **POWER** key comes on and stays on. Then release both keys.

4. Point the remote directly at the front panel of the device you want to control. Press **PLAY** on the remote and wait 5 seconds. The remote is testing a batch of 50 codes on your device.

Did your device turn on?

YES: Go to step 5.

NO: Press **PLAY** again. The remote 10 codes.

Keep pressing **PLAY** every 5 seconds off.

5. When your device turns off, press the **REVERSE** key on the remote and wait at least 2 seconds. The remote tries the last of the previous ten codes.

Did your device turn on?

YES: Press the **STOP** key. You're done! You've programmed this device key.

NO: Press **REVERSE** again. The remote in the batch.

Keep pressing **REVERSE** every 2 seconds back on. When it does, press 2

Note: If you accidentally press the **REVERSE** device turns on, press the **FORWARD** 5 seconds to see if your device turns off
