

205-RDBMS

Short questions:

1. Define RDBMS.

RDBMS stands for Relational Database Management System, which is a software system that manages and organizes data using a relational model.

2. List out Relational Algebra operations.

Relational Algebra operations include select, project, union, intersect, difference, cartesian product, join, and division.

3. Explain Minus clause.

The Minus clause is used in SQL to subtract the results of one query from another.

4. Explain union and intersect clauses.

The union clause is used to combine the results of two or more select statements, while the intersect clause is used to return the results that are common to two or more select statements.

5. List out DCL statements.

DCL (Data Control Language) statements include Grant and Revoke, which are used to grant or revoke access privileges to users or roles.

6. List out TCL statements.

TCL (Transaction Control Language) statements include Commit, Rollback, and Savepoint, which are used to manage transactions in a database.

7. What is the functionality of Rollback Statement?

The Rollback statement is used to undo a transaction and restore the database to its previous state.

8. What is the functionality of Grant Statement?

The Grant statement is used to grant access privileges to users or roles in a database.

9. What is the functionality of Commit Statement?

The Commit statement is used to save changes made during a transaction and make them permanent in a database.
