IBM i2 Integrated Law Enforcement: Technical Architecture and Deployment Guide Wil Jamison, John Dowling, IBM Redbooks, 2014-11-17 IBM i2 Integrated Law Enforcement is an IBM Smarter Cities solution that addresses the needs of modern day law enforcement agencies. It is a solution framework that provides the individual capabilities of the products that comprise the solution and extended capabilities developed through the synergistic integration of those product components. With today's security challenges and threats growing more sophisticated, perimeter defense alone is no longer sufficient. Few organizations are closed entities with well-defined security perimeters, which has led to the creation of perimeterless networks with ubiquitous access. Organizations need to have internal security systems that are more comprehensive, pervasive, and tightly integrated than in the past. Cisco Network Admission Control (NAC) Appliance, formerly known as Cisco Clean Access, provides a powerful host security policy inspection, enforcement, and remediation solution that is designed to meet these new challenges. Cisco NAC Appliance allows you to enforce host security policies on all hosts managed and unmanaged as they enter the interior of the network, regardless of their access method, ownership, device type, application set, or operating system.
