Code of Practice for Project Management for Construction and Development CIOB (The Chartered Institute of Building), 2014-07-23 The first edition of the Code of Practice for Project Management for Construction and Development published in 1992 was groundbreaking in many ways. Arts Development in Community Health Mike White, 2009

Arts in community health is a distinct area of activity that is characterised by the use of participatory arts to promote health Based on the latest international research this book considers how and why arts in community health has come about the characteristics of its practice and the challenges it poses for evaluation The rapid growth of this field of work in the UK from the mid 1990s has begun to impact on policy in the arts funding system on multi sector partnerships for health service delivery and in local authority cultural strategies yet the reasons for its emergence and the nature and diversity of the practice itself have gone largely unaccounted for It encompasses work in primary care community health and public health Arts in community health has not evolved simply as a result of the successful advocacy of an arts sector keen to demonstrate its relevance to health but rather through the wider recognition of a phenomenological connection between engagement in cultural activity and well being The pioneering viewpoints in this book promote an holistic approach to arts and public health focusing on the development of the person and not just the sick or dysfunctional part of that person Alongside the therapeutic benefits to patients the book also considers environmental improvements to support staff and using the arts to produce more creative kinds of health information This fully referenced guide compares and contrasts the arts in different cultures and healthcare systems how well it works why it works and the factors that determine its success The case studies examined prove shared creativity aids public health and simultaneously identifies and addresses the local and specific health needs in a community In the last decade health has become a recurrent topic in discussion of the role of the arts in society fuelled by a growing body of research into connections between culture and well being This pioneering practice of arts in community health began in the UK in the late 1980s through sporadic pilot projects placing local arts development in health promotion and primary care contexts It has since grown and expanded to embrace community health on a broad front hooking up with multi agency initiatives to address the social determinants of health through partnership working Mike White in the Introduction
