Awards Handbook Milton L. Levy, 1957 Team Performance Assessment and Measurement Michael T. Brannick, Eduardo Salas, Carolyn W. Prince, 1997-06-01 This book began at a conference on team performance measurement held at the University of South Florida. Several participants at the conference felt that a book on team performance measurement would be of interest to a broader audience and they began looking for authors in diverse disciplines. Some of the chapters in this book closely follow material presented at the conference. Many others report work that was done subsequently or was done by authors not present at the conference. The result is a book rich in its diversity of approaches to measurement and which contains illustrations of many different teams. This book is the first of its kind to bring together a collection of scholars and practitioners focusing solely on the problem of team performance measurement. Although much has been written about team and group effectiveness, little theoretical and empirical progress has been made in the measurement of team processes and outcomes. The book represents a major step forward both theoretically and empirically. Section 1 provides a rich theoretical basis for measurement including designing measures to be used in team training, measures of shared mental models and measures of team workload. Section 2 addresses methodological developments and issues including the design and validation of simulations, surveys and observer checklists. It also deals with issues such as the consistency of team performance and task and level of analysis issues. Section 3 provides applications and illustrations of team performance measures in such teams as nuclear power control room operators, theater technical crews and aircraft cockpit crews. Section 4 offers guidance for anyone interested in developing their own measures of team performance. There are both theoretical and practical reasons for the current interest in teams. Psychological research interest in groups and teams has returned and is now a thriving area. Self-managed work groups and semi-autonomous work groups have become increasingly common in industry so there is an increased interest in team functioning from a practical standpoint. This volume's purpose is to describe recent advances in the measurement of team performance, both process and outcome. Several of the chapters provide recommendations on how, when and why to measure aspects of teams. In addition to describing what is currently known, the book also discusses what remains to be known and what needs to be done next. The book is intended primarily for those interested in research about team processes and outcomes: researchers and academics who possess a basic understanding of statistics and psychometrics. The bulk of research reported has applied aims which provide much practical information such as how to design simulations, rating forms and dimensions of team performance useful for feedback to many kinds of teams. In addition, there are examples from several different kinds of teams including aircrews, nuclear power plant operators, hospital workers, ship combat information center groups and theater technicians. Therefore, the book should be useful to people who want to design measures to evaluate teams.

How to Get Into a Military Service Academy Michael Singer Dobson, 2015-10-08 The five United States military service academies are some of the most elite schools in the nation, taking the finest high school students and turning them into commissioned officers of the Army, Navy, Air Force, Coast Guard and Merchant Marine. Over

60 000 students a year begin the arduous process of applying and about 4 000 get in At West Point alone over 15 000 candidates start the applications process Less than a third of them finish it Some figure out that they aren t going to be competitive some get derailed with specific problems and some get lost and drop out even though they might have gotten in From applications to Congressional nominations from athletics to medical qualifications the process is unlike any other for getting into college This book leads students and their families through the process step by step offering the tools needed for the very best chance of success Covering special issues and concerns like LGBTQ women and minorities criminal records and more the author also discusses whether attending a service academy is RIGHT for the prospective student and what he or she can expect upon acceptance admission and attendance Using his personal experience in helping his son through the applications process Michael Singer Dobson provides all candidates with the ins and outs of the competition for a spot at one of these prestigious schools
