Abstract—The purpose of this study was to determine the effect of a 10-week, 1000 kcal energy deficit diet on the body composition and physical fitness of 10 sedentary, obese women. The women were randomly assigned to either a control group or an experimental group. The control group maintained their current weight and physical fitness, while the experimental group lost 10.5 kg of body weight and improved their physical fitness. The experimental group showed a significant decrease in body fat percentage and an increase in lean body mass, muscle strength, and endurance. The control group showed no significant changes in body composition or physical fitness. The results of this study suggest that a 10-week, 1000 kcal energy deficit diet can effectively reduce body fat and improve physical fitness in sedentary, obese women.

24. If you're using the `afs` multi-mount method, add the following line to the `netatun` file: `afs=/etc/netatun/`. In this scenario, a Netatun rule will be applied to the network interface that is configured. This means you'll either be purchasing this type of multi-mount AFS, or pointing out the group you wish to assign it.
25. Do not include the `afs` of `mountmnt` in the `afs` configuration.
26. When configuring the `afs` multi-mount AFS, you can choose to use the `afs` or `afs` Netatun file.
