WHAT IS COGNITIVE RECALL

Cognitive Recall is the science of implementing the optimal space of time between learning something then reviewing it and later quizzing yourself on it Scientists say studying effectively is not a function of how long or how often you study it s the order schedule and timing of your studies Traditional study guides tend to be nothing more than extended versions of repeated cram sessions which is neither efficient or effective Cramming is the opposite of Cognitive Recall learning evidenced by the extremely short lived benefits The memories from a cram session have been shown to fade away after only a few hours That s not an option if you are serious about passing the NLN PAX

CUSTOMIZED STUDY SCHEDULE

Designed around the ideal timeframe of 30 days our system can be easily extended or reduced to fit your specific schedule and test date This PAX Guide has the functionality of a customizable calendar telling you not only what to focus on but when to focus on it
