Children Who Fail at School But Succeed at Life Mark Katz, 2016-04-11 Understanding resiliency and student success by studying people who succumbed to risk but later triumphed A number of people who failed in school currently enjoy meaningful and successful lives They include though they are by no means limited to those with attention and executive function challenges learning disabilities learning and behavioral challenges arising out of traumatic events in their lives and even those impacted by all of the above Up until recently little attention was paid to successful people who did poorly in school Why One reason might be that many of us doubted that it was actually possible After all many loving parents and caring teachers spent countless hours trying their hardest to help these failing children turn things around in school sometimes with little or nothing to show for it If these children continued to struggle and fail in school with all this help and support it was understandable to assume that they would not succeed in the real world decades later without it So what did we miss Why were we so wrong about them And perhaps most importantly how can their life experiences help educators and parents understand what schools can do better to support students who are struggling today In his groundbreaking new book Mark Katz draws on research findings in clinical and social psychology cognitive neuroscience education and other fields of study as well as stories of successful individuals who overcame years of school failure to answer these and other questions In the process he shows how children who fail at school but succeed at life can give teachers and schools counselors and health care professionals parents and guardians even those whose childhood struggles have persisted into their adult years new remedies for combatting learning behavioral and emotional challenges reducing juvenile crime school dropout and substance abuse improving our health and well being and preventing medical problems later in life Teachers and Academic Partners in Urban Schools Lori Beckett, 2016-03-02 Showing how critical thinking and local democracy can be a spur to very real educational development within schools that are facing severe challenges this book provides us with one very valuable contemporary resource of hope Ian Menter Professor of Teacher Education University of Oxford UK Teachers and Academic Partners in Urban Schools identifies and addresses a major problem for practitioners teachers student teachers and teacher educators working in urban schools burdened by highly restrictive teaching methods and pressures to meet unrealistic benchmarks set by government In this book Lori Beckett investigates how to negotiate these tensions and challenges and offers an account of how to elevate practitioners professional voice on quality teaching along more democratic lines The book addresses key issues for teachers in urban schools such as fractures in teachers professional communities impacts of imposed marketizing policies and forced performative practices on schools the complexities of teaching and teachers concerns about practice as well as teaching practitioners perception of educational schools policy Both academic and teacher partners contribute to the work showcasing the ways they have engaged with each other in joint work and with local government Through this the book supports a professional and politicized dialogue about teaching and teacher education

offering a meaningful account of how to fashion a form of educative schooling for students and families with complex needs Written by a dynamic and experienced author this book brings Beckett's experience to bear on a controversial and complex area addressing the general trend towards increased regulatory policy in education It is an essential read for anyone interested in a rich analysis of how practitioners can work to reassert their professional voice and regain control of schools and teacher education and will also appeal to those interested in the larger project of restoring school democracy
