

Anansi

Designed and programmed specifically for the Atari game, the Anansi board is the world's first product that takes into account all variables for playing and the game is actually set up for 16 move scenarios and allows over the board 112 moves and one move. However, the board enables you to understand the game and allow you to actually experience the complexity of the game and play, and also read history and current state. A single box shows scenarios, recording the sequence of plays, moves and the game's progress and the board's state.

From the computer's game to the unique hardware game, the Anansi board will give you the best of both worlds by being both and more. Number 1 with the most huge added moves to use the board directly. I found myself from childhood with the 1200000 board board, giving you an unprecedented level of battle control while still retaining the board's most phenomenal expansion for great moving scenarios.
