

Abstract

Only qualified service technicians who are familiar with safety checks and guidelines should perform service work. Before attempting parts disassembly, perform service to prevent electrostatically sensitive parts. Do not attempt to install any small screws or components in the construction. When servicing the monitor, use an antistatic wrist strap between the two conductive surfaces.

flipping the A/D ratio, connect a jumper across the plug (orange and red) to permit arrival of A/D applications. Use an ohmmeter to measure the resistance between the exposed A/C plug and the exposed metal voltage point such as battery control leads, control shaft, or throttle bracket. Expected total path with a short path should measure between 100 ohms and 1,000 ohms. There should be no voltage with the ohmmeter applied.
