The **INPUT** and **SLIDE** key has three functions. It cycles through the video, audio, and video-audio inputs for your TV or audio component. It toggles between VCR and the TV input. It lets you separate the audio channel number from the sub-channel number in digital channel numbers.

Six-Component Universal Remote

Congratulations on your purchase of this six-component universal remote. This universal remote controls up to six electronic components and makes logging remote controls a thing of the past. Your remote is programmed to work with all brand-name components. This remote is unusually versatile because it has over 4000 keys that you can program to control any video component. The six-component universal remote is easy to use, fun to program, and gives you control in the touch of a button.

CODE BOOK
programming information is in the manual and code book in the remote. For more information, see the manual.

For the programming instructions, see the manual. The universal remote is already programmed to control most RCA, Zenith, and JVC components. Just press the corresponding key on the remote and the TV or video component will respond.

For more information

See the manual for more information on the remote's features and functions.

Insert the batteries

1. Remove the battery compartment cover.
2. Insert the batteries, matching the (+) and (-) marks inside the battery compartment.
3. Push the battery cover back into place.

When you are replacing batteries, try not to press any key after you've taken the old batteries out. Pressing any key while replacing batteries causes the remote to lose the programming you've programmed. The code book in the manual will help you reprogram the remote again.

Battery Precautions

- Do not mix old and new batteries.
- Do not mix alkaline, standard (non-rechargeable), or rechargeable (nickel-cadmium) batteries.
- Always insert old, used, or worn batteries properly and upside or down as shown in accordance with Local and National Regulations.

Battery Saver

Your universal remote control saves battery power by automatically turning off any key it pressed for more than 60 seconds. This saves your battery life should your remote get stuck in a place where the keys remain depressed, such as between your cushions.

Care and Maintenance

- Keep the remote dry. If it gets wet, wipe it dry immediately.
- Use and store the remote only in normal temperatures.
- Handle the remote gently and carefully. Don't drop it.
- Store the remote away from dust and dirt.
- Wipe the remote with a damp cloth occasionally to keep it looking new.
- Modifying or tampering with the remote's internal components, including disassembly and reassembly, voids the warranty.
