This gender specific treatment is an 8 week cognitive behavioral group intervention that consists of 16 90 minute sessions. The JJAM Facilitator Manual includes a user friendly session by session guide along with the accompanying workbook materials for youth participants. JJAM addresses the unique gender and developmental needs of girls and young women in the juvenile justice system such as the link between relational and physical aggression, the importance of strengthening and repairing damaged relationships, and the need to transfer skills learned in a facility to day to day life in the community following discharge. Session activities elicit real life examples from participants so that activities and content can be tailored to the characteristics, needs, and interests of the specific girls and young women in each group. JJAM was developed through a rigorous research process and is identified as an empirically based program and empirically supported treatment.
