Elias, Joseph J. Ferrito, Dominic C. Moceris, 2015-12-14 To better serve the whole child look at the whole report card Although parents and teachers spend more time in conferences talking about behavior than they do about rubrics and test scores too many teachers are still guessing when it comes to using outdated behavior ratings and comments to describe the whole child With this book you'll take report cards to the next level integrating social emotional learning and character development into any grading system Resources include Guided exercises for analyzing existing report cards Suggested report card designs Tips on improving teacher parent communication Case studies Testimonials from teachers and students **Classroom Assessment** Dr Craig Mertler, 2016-09-13 Provides detailed information on the functions of assessment how to construct administer and interpret the results of teacher developed assessment techniques and how to interpret the results of externally developed instruments such as standardized tests Both traditional and newer alternative assessment techniques are covered Advantages and disadvantages of each assessment technique are discussed A companion website helps both instructors and students obtain additional information on topics of special interest to them Numerous examples of the principles and procedures make it easy for students to understand the material The highly practical nature of this book stems

from the focus on how assessment intertwines with other everyday activities in classrooms Measurement theory and computational procedures that are unlikely to be used by classroom teachers are de emphasized producing a textbook that provides comprehensive coverage without being unnecessarily technical **Developing Standards-Based Report Cards**

Aim for a target based grading system and create stronger learning opportunities. Do you wish there was more clarity when it comes to measuring student progress and learning? What if there was a way to utilize grading and assessment to focus on learning rather than performance and the process rather than the product? As grading assessment and reporting continue to be relevant topics of discussion, this book helps you create a functional plan to elevate and advance standards based grading practices. Teachers and administrators will learn how to assess grade and report against specific learning targets rather than standards as a whole to make skill acquisition the highest priority. Grounded in application to provide focus and clarity, this book features Real case studies of schools that have incorporated target based assessment, feedback, grading and reporting. Practical examples to guide implementation. Questions, checklists, illustrations and audits of practice to showcase the work in action. An accessible format and layout that support both immediate implementation and long term goals. Despite being a topic that generates emotion and resistance to change, target based assessment builds the foundation for a learner centered system that provides clear expectations and feedback for teachers, students and parents. Grading for Impact is a simple and straightforward guide to rethinking grading based on mastery of specific skills and concepts rather than broadly written standards. Real world examples of teachers struggling with and answering the old questions are included: How do we grade fairly and accurately and How do we use grades as an
