Firearm Abuse Steven Brill,1977 Analysis of statistics from Atlanta Baltimore Chicago Detroit Houston New York Philadelphia San Francisco and Washington DC to study trends in firearm abuse as a first step toward developing policy alternatives This study represents the first sustained effort to examine from the police perspective the problem of firearm abuse by using police records Some intriguing information has been developed For example a significant finding emerges from an examination of samples of firearms confiscated in ten cities Data show the frequency with which higher priced well known brands of handguns appear in the samples of firearms believed to be involved in murder robbery assault and other felonies This evidence clearly indicates that the belief that so called Saturday night specials inexpensive handguns are used to commit the great majority of these felonies is misleading and counterproductive and can confuse the police administrator in confronting
