

TITLE: *The X Game*

GENRE: supernatural horror

OVERVIEW

It was a pleasure to read your novel, *The X Game*. The title itself evokes a sense of play and mystery—what is the X? And what kind of game is it?

In critiquing your novel, I read it first as a reader, then again as an editor. Although you will find occasional comments inserted in bubbles in the electronic manuscript, the majority of my feedback is summarized here in this critique. I will close this critique with my editorial recommendations and final words.

PLOT & STRUCTURE

This has all the elements of a classic horror story. From the beginning, the main character, a leader of a mysterious order, turns off the security system inside the manor, immediately cueing the reader that the protagonist is about to do something clandestine. There is an underground tunnel and secret doors, and rumors of frightful things inside the forest. By the end of the prologue, it's clear from the tropes you use that this is a horror story with Gothic elements, and that from this point on, things are only going to get worse—in a delicious, thrilling way.

You wisely start in the middle of the action and propel the protagonist—and the reader—into the unknown, which we know is going to be dangerous. There are encounters—with a mysterious creature and an attack by wolves—that keep the action going and the reader reading—all good.

After Egri is rescued by Jordan (perhaps too conveniently?) and taken to the manor, he is confronted by a stranger—Marlo—who is the one who summoned him in the first place. What Egri does not know, but we readers know, is that Marlo is not a normal human being. In fact, he too is a supernatural creature, possibly a vampire. In other words, the protagonist is not really safe nor is he in an ordinary place, but rather he has entered an extraordinary world, and that as much as he wishes to turn back, it is too late.

...

Overall, the plot is unfolding naturally—or perhaps I should say, classically. The danger in taking this approach is that a sophisticated reader of horror is not going to find much here that is fresh and new in the way of storytelling. But if it's an ordinary horror story that you're hoping to provide, then I think that's what you have here.

TITLE: *My Hollywood*

GENRE: memoir

OVERVIEW

It was a pleasure to work on your book, *My Hollywood*. As a reader I learned a great deal about the impact of consumer culture on women and the empty feminine ideals it promotes. And I learned much about you, a writer, thinker, and woman who has been brave enough to pull all the stops and reflect on your upbringing and analyze the forces that have influenced your life. The voice you write with is smart, wisecracking, and honest; a voice that young women today can relate with. I think your book will speak to many women who struggle with the same issues you once faced [...] in the process of becoming a Hollywood desirable.

What follows is an overview of the strengths and weaknesses of your manuscript and includes editorial recommendations on what and how to revise it. Be prepared to do several more rounds of revisions, with each revision bringing your book closer to perfection and the fulfillment of your vision.

STRUCTURE

The structure you have now is not consistently linear, and the links from one topic to the next are not often clear. [...] Your timeline is a bit shuffled, with a chapter of your life post-college coming before a chapter on your college years. It's better in this instance to tell your story chronologically so as to give your book some structure and order.

Breaking up your book into three acts works fine. Starting Act I after the introductory chapter is good. And having Act II at the start of your college years is also a good choice. But I suggest moving chapter 6 to Act II since it deals with your college years, not high school. As for Act III, consider starting it at chapter 18—which is after your stint as a script reader. The last sentence of chapter 17 rings a satisfying death knell for the end of Act II and segues nicely to chapter 18.

I also recommend creating a new chapter—between chapters 3 and 4—that focuses on [...]. I also suggest breaking up chapter 4 into two separate chapters (see page 28 of your manuscript).

The "I Hate to Write" Guide to College Level Essays Beth Daniels, 2017-12-29 THE I HATE TO WRITE GUIDE TO COLLEGE LEVEL ESSAYS 4 IN 1 does not replace the required text books in English Composition courses but it does explain how to write an essay at this level without using academic words like thesis I never understood what that meant when I was an undergraduate so I don't expect everyone to know what it means but I do explain what it is in regular language The four volumes grouped together here have appeared in e book form but never as a print copy It was probably past time to offer another option The reason I wrote BASIC ESSAY BOOK CRITIQUE and RESEARCH PAPER is that they were the first essays students were required to write not just in composition class but in other courses CHOOSING A TOPIC is something that has boggled many a mind These are my guidelines and enough students told me that the way I detailed essay requirements finally allowed the light bulb moment of understanding the process be lit for them Hopefully you'll find something helpful too

Lecture Notes on Paper Critique L. O. Ogundipe, Hodgson, R. E, 2005 The text is presented in chunks of approximately 10 True False questions on specific concepts in research methodology and statistics This is followed by clear explanations from first principles that assume no prior knowledge This book is for the paper critique section of the MRCPsych 2 examination but clinical tutors organisers of journal clubs and clinicians interested in research will find the book helpful It is particularly invaluable for clinicians interested in evidence based medicine This book is intended to be used as an aide memoir carried in the pocket and referred to as often as necessary It enables self assessment to be carried out in the hope that any gaps in knowledge will be identified Much of this book focuses on practical application of statistical and research methodology concepts into critical paper reading The reader is encouraged to attempt the questions before the reading the suggested answers

Quality Research Papers Nancy Jean Vyhmeister, Terry Dwain Robertson, 2020-05-19 This will be the fourth edition of a time tested resource for students writing papers in the fields of religion and theology It provides essential guidance for writing assignments typical in graduate programs in religion and has served as a standard textbook for seminary research courses The fourth edition is updated to include information on Turabian 9th edition SBL Handbook 2nd edition new resource lists and additional help with online resources and formatting issues Most importantly this new edition is revised from the perspective of information abundance rather than information scarcity Today's research mindset has shifted from find anything and be satisfied with anything to choose intentionally reliable and credible sources Quality Research Papers will guide students through an overabundance of online and library resources and help them craft excellent essays

System, 1912 The Magazine of Business, 1912 *Comprehensive Sampling and Sample Preparation* Josep M. Bayona, Paola Dugo, X. Chris Le, Hian Kee Lee, Xing-Fang Li, Heather Lord, 2012-12-31 Comprehensive Sampling and Sample Preparation is a complete treatment of the theory and methodology of sampling in all physical phases and the theory of sample preparation for all major extraction techniques It is the perfect starting point for researchers and students to

design and implement their experiments and support those experiments with quality reviewed background information In its four volumes fundamentals of sampling and sample preparation are reinforced through broad and detailed sections dealing with Biological and Medical Environmental and Forensic and Food and Beverage applications The contributions are organized to reflect the way in which analytical chemists approach a problem It is intended for a broad audience of analytical chemists both educators and practitioners of the art and can assist in the preparation of courses as well in the selection of sampling and sample preparation techniques to address the challenges at hand Above all it is designed to be helpful in learning more about these topics as well as to encourage an interest in sampling and sample preparation by outlining the present practice of the technology and by indicating research opportunities Sampling and Sample preparation is a large and well defined field in Analytical Chemistry relevant for many application areas such as medicine environmental science biochemistry pharmacology geology and food science This work covers all these aspects and will be extremely useful to researchers and students who can use it as a starting point to design and implement their experiments and for quality reviewed background information There are limited resources that Educators can use to effectively teach the fundamental aspects of modern sample preparation technology Comprehensive Sampling and Sample Preparation addresses this need but focuses on the common principles of new developments in extraction technologies rather than the differences between techniques thus facilitating a more thorough understanding Provides a complete overview of the field Not only will help to save time it will also help to make correct assessments and avoid costly mistakes in sampling in the process Sample and sample preparation are integral parts of the analytical process but are often less considered and sometimes even completely disregarded in the available literature To fill this gap leading scientists have contributed 130 chapters organized in 4 volumes covering all modern aspects of sampling and liquid solid phase and membrane extractions as well as the challenges associated with different types of matrices in relevant application areas
