Excerpt: apparel and sought and obtained employment as a teamster in the quartermasters department. Her features were very large and so coarse and masculine was her general appearance that she would readily have passed as a man and in her case the deception was no doubt easily practiced. Next day she was caught and proved to be a rather prepossessing young woman and though necessarily bronzed and hardened by exposure I doubt if even with these marks of campaigning she could have deceived as readily as did her companion. How the two got acquainted I never learned and though they had joined the army independently of each other yet an intimacy had sprung up between them long before the mishaps of the foraging expedition. They both were forwarded to army headquarters and when provided with clothing suited to their sex sent back to Nashville and thence beyond our lines to Louisville. On January 9 by an order from the War Department the Army of the Cumberland had been divided into three corps designated the Fourteenth, Twentieth and Twenty-first. This order did not alter the composition of the former grand divisions nor change the commanders but the new nomenclature was a decided improvement over the clumsy designations Right Wing, Centre and Left Wing which were well calculated to lead to confusion. Sometimes McCook's wing became the Twentieth Corps and my division continued of the same organization and held the same number as formerly the Third Division Twentieth Corps. My first brigade was now commanded by Brigadier General William H. Lytle, the second by Colonel Bernard L. Irvin and the third by Colonel Luther P. Bradley. Low-cost Physics Experiments Using New Technologies Salvador Gil, 2024-05-28. This book presents a set of low cost physics experiments making use of the new technologies available: data collection and analysis systems by computers, Internet, video, commercial electronics, smartphones, etc., while highlighting the methodological aspects of physics and science in general. The projects are aimed at university students of science and engineering, although some may be used in high schools. The experiments would enable students to answer the questions: How do we know this? Why do we believe in that? These questions illustrate the nature of the scientific thinking process. This book is complemented by the site www.
