Life Storying in Oral History Jarmila Mildorf, 2023-06-06 This book proposes the concept of fictional contamination to capture the fact that fictionalization and literary complexity can be found across different kinds of narrative. Exploring conversational storytelling in oral history and other interviews from socionarratological perspectives, the book systematically discusses key narrative features such as story templates, dialogue, double deixis, focalization or perspective taking, and mind representation as well as special narrative forms including second person narration and narratives of vicarious experience. These features and forms attest to storytellers' linguistic creativity and serve the function of involving listeners by making stories more interesting. Shared by fictional and conversational narratives at a basic level, they can bring conversational stories closer to fiction and potentially compromise their credibility if used extensively. Detailed analyses of broad-ranging examples are undertaken against a rich narrative theoretical background drawn from the fields of narratology, linguistics, oral history, life storytelling, psychology, and philosophy. The book is of interest to scholars and students working in these fields and anyone fascinated by the richness of conversational storytelling.

Handbook of Communication Disorders Amalia Bar-On, Dorit Ravid, Elitzur Dattner, 2018-04-23 The domain of Communication Disorders has grown exponentially in the last two decades and has come to encompass much more than audiology, speech impediments, and early language impairment. The realization that most developmental and learning disorders are language-based or language-related has brought insights from theoretical and empirical linguistics and its clinical applications to the forefront of Communication Disorders science. The current handbook takes an integrated psycholinguistic, neurolinguistic, and sociolinguistic perspective on Communication Disorders by targeting the interface between language and cognition as the context for understanding disrupted abilities and behaviors and providing solutions for treatment and therapy. Researchers and practitioners will be able to find in this handbook state-of-the-art information on typical and atypical development of language and communication abilities across the human lifespan from infancy to the aging brain, covering all major clinical disorders and conditions in various social and communicative contexts such as spoken and written language and discourse, literacy issues, bilingualism, and socioeconomic status.

Retelling Scripture Ruth Sheridan, 2012-01-06 The last century of scholarship on the Old Testament citations in the

Gospel of John has concentrated almost exclusively upon source critical or redaction critical issues with the aim of determining the Christological import of the citations The current book brings a narrative rhetorical methodology to bear upon the seven explicit Scriptural citations in the Gospel's Book of Signs 1 19 12 50 that are prefaced by a distinct introductory formula 1 19 12 15 These citations are each addressed to or imply a particular textual audience namely the Jews This book argues that as such the citations do not merely have Christological significance but function at the narrative level to encourage an ideal reader to construct a particularly negative characterization of the Jews
