New Curriculum History, 2019-02-11 Rereading the historical record indicates that it is no longer so easy to argue that history is simply prior to its forms Since the mid 1990s a new wave of research has formed around wider debates in the humanities and social sciences such as decentering the subject new analytics of power reconsideration of one dimensional time and three dimensional space attention to beyond archival sources alterity Otherness the invisible and more In addition broader and contradictory impulses around the question of the nation transnational post national proto national and neo national movements have unearthed a new series of problematics and focused scholarly attention on traveling discourses national imaginaries and less formal processes of socialization bonding and subjectification New Curriculum History challenges prior occlusions in the field building upon and departing from previous waves of scholarship extending the focus beyond the insularity of public schooling the traditional framework of the self contained nation state and the psychology of the schooled individual Drawing on global studies historical sociology postcolonial studies critical race theory visual culture theory disability studies psychoanalytics Cambridge school structuralisms poststructuralisms and infra and transnational approaches the volume holds together not despite but because of differences and incommensurabilities in rereading historical records

Polysemy in Cognitive Linguistics H. Cuyckens, Britta Zawada, 2001-01-01 In Cognitive Linguistics polysemy is regarded as a categorizing phenomenon i e related meanings of words form categories centering around a prototype and bearing family resemblance relations to one another Under this polysemy categorization view the scope of investigation has been gradually broadened from categories in the lexical and lexico grammatical domain to morphological syntactic and phonological categories The papers in this volume illustrate the importance of polysemy in describing these various categories A first set of papers analyzes the polysemy of such lexical categories as prepositions and scalar particles and looks at the import of polysemy in frame based dictionary definitions A second set shows that noun classes case and locative prefixes constitute meaningful and polysemous categories Three papers then pay attention to polysemy from a psychological perspective looking for psychological evidence of polysemy in lexical categories

Languages of Instruction for African Emancipation Birgit Brock-Utne,Rodney Kofi Hopson,2005 *Languages of Instruction*

for African Emancipation is a collection of case studies from seven African countries poses questions such as What alternatives are there for educational language policies towards African emancipation What efforts have governments made to change the language policy in favour of African languages and how far have they succeeded What challenges do African learners face when it comes to current language of instruction policies The authors reject a language education policy that neglects the multilingualism existing in Africa that reinforces patterns of privilege that existed in the colonial era further entrenching the schism between the elite and the masses They give short shrift to the new justification of the unjustifiable status accorded to English in Africa as the language of globalisation suggesting that it is not relevant to the vast majority of African lives and their human development The sum of thoughts presented suggests that the answer to the language question provides the key to development challenges and further emancipation of the African peoples which it is argued is at the same time a question that will determine whether Africa will remain a recognisable and distinctive cultural component of humanity or whether Africans will cease to exist culturally as Africans

Ideophones Erhard Friedrich Karl Voeltz, Christa Kilian-Hatz, 2001-01-01 The present volume represents a selection of papers presented at the International Symposium on Ideophones held in January 1999 in St Augustin Germany They center around the following hypotheses Ideophones are universal and constitute a grammatical category in all languages of the world ideophones and similar words have a special dramaturgic function that differs from all other word classes they simulate an event an emotion a perception through language In addition to this unique function a good number of formal parallels can be observed The languages dealt with here display strikingly similar patterns of derivational processes involving ideophones An equally widespread common feature is the introduction of ideophones via a verbum dicendi or complementizer Another observation concerns the sound symbolic behavior of ideophones Thus the word formation of ideophones differs from other words in their tendency for iconicity and sound symbolism Finally it is made clear that ideophones are part of spoken language the language register where gestures are used rather than written language

The Routledge Handbook of World Englishes Andy Kirkpatrick, 2010-06-17 The Routledge Handbook of World Englishes constitutes a comprehensive introduction to the study of World Englishes drawing on the expertise of leading authors within the field The Handbook is structured in nine sections covering historical perspectives core issues and topics and new debates which together provide a thorough overview of the field taking into account the new directions in which the discipline is heading Among the key themes covered are the development of English as a lingua franca among speakers for whom English is a common but not first language the parallel development of English as a medium of instruction in educational institutions throughout the world and the role of English as the international language of scholarship and scholarly publishing as well as the development of computer mediated Englishes including cyberprose The Handbook also includes a substantial introduction and conclusion from the editor The Routledge Handbook of World Englishes is the ideal resource for postgraduate students of applied linguistics as well as those

Onomastics in Interaction With Other Branches of Science. Volume 2. Anthroponomastics Urszula Bijak, Paweł Swoboda, Justyna B. Walkowiak, 2023-12-12

Onomastics is an area of scholarly interest that has grown considerably in importance in recent years. Consequently, the 27th International Congress of Onomastic Sciences held in Kraków, Poland, gathered scholars from all over the world active in all subfields of onomastic enquiry as well as those exploring the areas bordering on other disciplines of the humanities. It thus became a venue for presenting state-of-the-art research in the study of proper names, proposing novel approaches and opening new vistas for future research. The present work is the second of the three volumes of conference proceedings that were the fruit of the congress. Devoted to personal naming, it contains 28 individual articles contributed by 32 scholars. Some of them study recent fashions in name-giving in countries as diverse as Bulgaria, Japan, Latvia, Lithuania, or Sweden. Others explore historical trends in given name choice exemplified by Estonia or the Netherlands. Family names are represented by the analyses of married names in Hungary, of the surnames of Zagreb Jews, of German surnames in Latvia, and the Carpathian Basin, or of changes of foreign-sounding surnames in Sweden. Unconventional naming proved scientifically fruitful too, as can be seen in the chapters on village bynames in Romania, or student nicknames in Russia. Finally, there are researchers who provide a general overview of naming patterns in countries as varied as Botswana and Hungary, or Romania and China. The opportunities offered by the application of new technology to onomastic research are explored in relation to the namestock in Denmark and the Netherlands. Simultaneously, these technologies may also themselves lead to the creation of novel objects of study, a case in point being Russian Internet usernames. Anthroponymic data may inform non-onomastic research as well; for instance, they can offer insight into a country's history or ethnic composition, as evidenced by texts dealing with personal naming in Hungary or Ukraine. The volume is complemented by articles whose focus is the interface of onomastics and pragmatics, phonetics, prosody, and gender studies, drawing on examples drawn from Dutch, Japanese, Romanian, Russian, Spanish, and Swedish. The book is a must not only for onomasticians but also for researchers in related disciplines ranging from history via human geography or philosophy of language to social studies. However, professionals active in naming will find it useful as well, since it provides a much-needed supranational perspective and enables cross-cultural comparisons.

Theoretical Approaches to African Linguistics Akinbiyi Akinlabi, 1995. The first of a new series devoted to the study of African linguistics, this study presents papers on a wide range of disciplines pertinent to the field that will be of interest to students and researchers. This first volume includes work on Niger-Congo languages such as Yoruba and Igbo and several Bantu languages.

Grappling with the Beast, 2010-01-25. This volume contributes rich new material to provide insights into indigenous responses to the colonial empires of Great Britain, South Africa, Swaziland, Botswana, Zimbabwe, Rhodesia, and Germany, Namibia, and explore the complex intellectual, cultural, literary, and political borders and identities that emerged across these spaces. Contributors include distinguished global scholars in the field as well as exciting young scholars. The

essays link global national local forces in history by analysing how indigenous elites not only interacted with colonial empires to absorb adapt and re cast new ideas forms of discourse and social formations but also networked with ordinary people to forge new social ethnic and political identities and viable social forces Translated and other primary texts in appendices add to the insights
