Sewn Product Quality A Management Perspective:

Sewn Product Quality Doris H. Kincade, 2008 Sewn Product Quality A Management Perspective takes complex industry specific terminology and processes and explains them with pictures and text that is relevant to today's market. The book discusses all aspects of quality devoting separate sections to materials and processes and focusing specifically on the new consumer centric business environment. Taking a managerial perspective it presents definitions, techniques, and standards unique to the sewn products industry and shows how to impact quality throughout the design, production, and delivery process.

Beyond Design Sandra J. Keiser, Deborah A. Vandermar, Myrna B. Garner, 2022-01-01 The Synergy of Apparel Product Development Fifth Edition maps the processes required to bring apparel products from concept to consumer. This full color text takes students step by step through the decision making involved in the pre production processes of apparel product development including business, creative, technical, and production planning. Updated chapter content reflects evolving industry practice. It demonstrates how these processes must be coordinated to get the right product to market when consumers want it and at a price they are willing to pay in an increasingly digital environment. The text seeks to address how functional approaches vary depending on a business's size and fashion focus. More global in scope, the fifth edition includes examples and case studies of multi national companies and incorporates global nomenclature when it differs from the US industry. This new edition also advances its discussion of how new technologies continue to shorten the product development calendar. The book is written to help students anticipate the chaotic pace of change not only in fashion trends but also in the fashion system itself.

Beyond Design Sandra Keiser, Myrna B. Garner, Deborah Vandermar, 2017-08-10 This informative full color text takes students step by step through the decision making involved in the pre production processes of apparel product development: planning, forecasting, fabricating, line development, technical design, pricing, sourcing, and distribution. It demonstrates how these processes must be coordinated to get the right product to market when consumers want it and at a price they are willing to pay. The 4th Edition has been edited around a new metastructure to maximize student learning. It continues to build on the themes of sustainability, business ethics, and the impact of fast fashion and social media while seeking to address opportunities for both large and small companies and entrepreneurs. The text advances its discussion of how new technologies continue to shorten the product development calendar. Chapters have been updated to include current examples, updated charts and graphs, and more case studies. There are updated references to contemporary developments with examples relevant to today's student. New to this Edition: Includes international examples and case studies that address the effects of globalization. Advances the discussion of the pros and cons of fast fashion vs slow fashion. Revised easier to read charts and graphs and 30% new color photographs. Thoroughly revised Chapters 12 Sourcing and 13 Costing and Pricing updated with most recent info on trade laws, changes in sourcing criteria, and wages in international sourcing countries.
