*Population Reconstruction* Gerrit Bloothoof, Peter Christen, Kees Mandemakers, Marijn Schraagen,2015-07-22 This book addresses the problems that are encountered and solutions that have been proposed when we aim to identify people and to reconstruct populations under conditions where information is scarce ambiguous fuzzy and sometimes erroneous The process from handwritten registers to a reconstructed digitized population consists of three major phases reflected in the three main sections of this book The first phase involves transcribing and digitizing the data while structuring the information in a meaningful and efficient way In the second phase records that refer to the same person or group of persons are identified by a process of linkage In the third and final phase the information on an individual is combined into a reconstruction of their life course The studies and examples in this book originate from a range of countries each with its own cultural and administrative characteristics and from medieval charters through historical censuses and vital registration to the modern issue of privacy preservation Despite the diverse places and times addressed they all share the study of fundamental issues when it comes to model reasoning for population reconstruction and the possibilities and limitations of information technology to support this process It is thus not a single discipline that is involved in such an endeavor Historians social scientists and linguists represent the humanities through their knowledge of the complexity of the past the limitations of sources and the possible interpretations of information The availability of big data from digitized archives and the need for complex analyses to identify individuals calls for the involvement of computer scientists With contributions from all these fields often in direct cooperation this book is at the heart of the digital humanities and will hopefully offer a source of inspiration for future investigations

**The Myth of Sex Addiction** David J. Ley, 2012-03-08 The media today is filled with powerful men in trouble for their sexual behaviors and invariably they are diagnosed as sexual addicts Since Adam first hid his nakedness from God and pointed the finger at Eve men have struggled to take responsibility for their sexuality Over the past three decades these behaviors have come to reflect not a moral failing but instead evidence of an ill defined disease that of sexual addiction The concept of sexual addiction is a controversial one because it is based on questionable research and subjective moral judgments Labeling these behaviors as sex addiction asserts a false dangerous myth that undermines personal responsibility Not only does this epidemic of sex addiction excuse mislabel male sexuality as dangerous and unhealthy but it destroys our ability to hold

people accountable for their behaviors By labeling males as weak and powerless before the onslaught and churning tide of lust we take away those things that men should live up to personal responsibility integrity self control independence accountability self motivation honor respect for self and others In *The Myth of Sex Addiction* Ley presents the history and questionable science underlying this alleged disorder exposing the moral and cultural judgments that are embedded in the concept as well as the significant economic factors that drive the label of sex addiction in clinical practice and the popular media Ley outlines how this label represents a social attack on many forms of sexuality male sexuality in particular as well as presenting the difficulty this label creates in holding people responsible for their sexual behaviors Going against current assumptions and trends Ley debunks the idea that sex addiction is real or at least that it is as widespread as it appears to be Instead he suggests that the high sex behaviors of some men is something that has been tacitly condoned for countless years and is only now labeled as a disorder as men are being held accountable to the same rules that have been applied to women He suggests we should expect men to take responsibility for sexual choices rather than supporting an approach that labels male sexual desire as a demonic force that must be resisted feared treated and exorcised
