Down: A book about exams for pushy parents, streetwise students and tireless teachers Jerry Jarvis, 2011-12-31

Whether you're studying for exams or are a parent, teacher, governor or administrator, this eye-opening book will be a valuable guide. It deals with the main qualifications in the UK including GCSE, A Level, BTEC, the Diploma, International Baccalaureate, the English Baccalaureate and other vocational and professional qualifications. Read it to find out: How to achieve the best results; Whether some subjects are easier than others; The truth about 'dumbing down' and educational standards; What examiners are looking for and how they decide what grade to award; Why millions of exam questions are marked by non-teachers; How to claim an advantage and challenge grades; How people cheat and the consequences of getting caught; What the future holds for exams and qualifications. **Revise for Mechanics**

Secondary School Students Christopher Blake, 2016-11-07. Diploma Thesis from the year 2011 in the subject Psychology, Intelligence and Learning, Psychology, grade none, course MA IN TESOL, language English, abstract: In the UAE and globally, high stakes testing is prevalent in second language learning. One important and integral part of high stakes English language tests is the oral proficiency interview, which can be a pre-requisite to gaining admission to an English-speaking university. The volunteer participants were 25 15-17 year-old Emirati students from two IGCSE ESL classes that I do not teach. This study included a videotaped mock oral proficiency IGCSE interview, audiotaped semi-structured individual interviews, questionnaires and an audiorecorded semi-structured focus group discussion. The findings suggested that language and test anxiety is multi-faceted and can affect boys and girls in a number of different ways and at different times during class activities and also in an OPI. In addition, all participants showed different physical signs of test anxiety during the first two stages of the OPI, and these physical signs of test anxiety were considerably less frequent in the final part of the OPI. The causes and types of anxiety reported by the students ranged from language learning difficulties, problems trying to retrieve appropriate English vocabulary, code-switching from Arabic language to English and vice versa, differences in social status of the teachers, language instructors and unfamiliarity with the interlocutor. The pedagogical implications of these findings for understanding anxiety and oral test anxiety with second language students for teachers, schools and examination boards are discussed, as are suggestions for future research. Furthermore, considering the important role of teachers in second language pedagogy and the use of English as the main language of instruction, this study also offers suggestions to lessen anxiety for oral class activities and oral assessments and presents test-taking strategies.
