Shannons Way Bello English Edition:

Army History ,2018 The Morality of Drone Warfare and the Politics of Regulation Marcus Schulzke,2016-10-26 This book discusses the moral and legal issues relating to military drones focusing on how these machines should be judged according to the principles of just war theory The author analyses existing drones like the Predator and Reaper but also evaluates the many types of drones in development The book presents drones as not only morally justifiable but having the potential to improve compliance with the principles of just war and international law Realizing this potential would depend on developing a sound regulatory framework which the book helps to develop by considering what steps governments and military forces should take to promote ethical drone use It also critically evaluates the arguments against drones to show which should be abandoned and which raise valid concerns that can inform regulations *FAA Inspection Authorization Directory* ,1992 Nature Inc. Bram Büscher,Wolfram Dressler,Robert Fletcher,2014-05-29 Can market forces solve the world s environmental problems The stakes are undeniably high With wildlife populations and biodiversity riches threatened across the globe it is obvious that new and innovative methods of addressing the crisis are vital to the future of the planet But is the market the answer As public funding for conservation efforts grows ever scarcer and the private sector is brimming with ideas about how its role along with its profits can grow market forces have found their way into environmental management to a degree unimaginable only a few years ago Ecotourism payment for environmental services PES and new conservation finance instruments such as species banking carbon trading and biodiversity derivatives are only some of the market mechanisms that have sprung into being This is NatureTM Inc a fast growing frontier of networks activities knowledge and regulations that are rapidly changing the relations between people and nature on both global and local scales NatureTM Inc brings together cutting edge research by respected scholars from around the world to analyze how neoliberal conservation is reshaping human nature relations that have been fashioned over two centuries of capitalist development Contributors synthesize and add to a growing body of academic literature that cuts across the disciplinary boundaries of geography sociology anthropology political science and development studies to critically interrogate the increasing emphasis on neoliberal market based mechanisms in environmental conservation They all grapple with one overriding question can capitalist market mechanisms resolve the environmental problems they have helped create *Moral Constraints on War* Carl Ceulemans,Bruno Coppieters,Nicholas Fotion,2020-01-30 This third edition of *Moral Constraints on War* offers a principle by principle presentation of the ethics of war as is found in the age old tradition of the Just War Parts one and two trace the evolution of Just War Theory analyzing the principles of jus ad bellum and jus in bello the principles that determine the conditions under which it is just to start a war and then conduct military operations Each chapter provides a historical background of the principle under discussion and an in depth analysis of its meaning More so than in the previous editions there is a special focus on the transcultural nature of the principles Besides theoretical clarifications each of the principles is

also put to the test with numerous historical and contemporary examples In Part three Just War Theory is applied in three specific case studies the use of the atomic bomb against Japan in World War II the Korean War 1950-53 and the use of armed drones in the war on terror Bringing together an international coterie of philosophers and political scientists this accessible and practical guide offers both students of military ethics and of international relations rich up to date insights into the pluralistic character of Just War Theory The Gods of Venice J. Shannon Alan J. Shannon, Alan J. Shannon, 2009-10

Throughout its history enchanting and mysterious Venice has attracted seekers Some travel to the city to experience its storied charms while others look for something else This is the story of vastly different seekers whose lives unexpectedly intersect over six decades in a city shrouded in mystery In the Venice of pre WWII Costanza a talented baker and her husband Piero Agostino a glass blower are blessed with a daughter Breva She is the love of their life until the waters of Venice snatch her from them Bereaved their lives are lost to them In present day Venice Claudia Baggi the diffident daughter of a countess and Louis Howard an unemployed expatriate from Chicago have become good friends in the last year Together they concoct a plot that will allow Claudia to remain in Venice instead of returning home with her pious and controlling mother Countess Baggi Claudia and Louis restore a crumbling palazzo and convert it into a hotel But the burning of the old La Fenice opera house triggers a series of unforeseeable events In this saga of love and redemption Claudia Louis Costanza Piero and the Countess come to realize that rebirth is possible from the ashes of devastation Sampling Theory, a Renaissance Götz E. Pfander, 2015-12-08

Reconstructing or approximating objects from seemingly incomplete information is a frequent challenge in mathematics science and engineering A multitude of tools designed to recover hidden information are based on Shannon's classical sampling theorem a central pillar of Sampling Theory The growing need to efficiently obtain precise and tailored digital representations of complex objects and phenomena requires the maturation of available tools in Sampling Theory as well as the development of complementary novel mathematical theories Today research themes such as Compressed Sensing and Frame Theory re-energize the broad area of Sampling Theory This volume illustrates the renaissance that the area of Sampling Theory is currently experiencing It touches upon trendsetting areas such as Compressed Sensing Finite Frames Parametric Partial Differential Equations Quantization Finite Rate of Innovation System Theory as well as sampling in Geometry and Algebraic Topology *Public Works Appropriations for 1960* United States. Congress. House. Appropriations, 1959 **Public Works Appropriations for 1960** United States. Congress. House. Committee on Appropriations, 1959 Hearings United States. Congress. House, 1959 Civil functions, Department of the Army United States. Congress. Senate. Committee on Appropriations, 1959 Hearings United States. Congress. Senate. Committee on Appropriations, 1959 Public Works Appropriations, 1960 United States. Congress. Senate. Committee on Appropriations, 1960 **The Cambridge Handbook of the Just War** Larry May, 2018-02-15 What

makes a war just What makes a specific weapon strategy or decision in war just The tradition of Just War Theory has provided answers to these questions since at least 400 AD yet each shift in the weapons and strategies of war poses significant challenges to Just War Theory This book assembles renowned scholars from around the world to reflect on the most pressing problems and questions in Just War Theory and engages with all three stages of war jus ad bellum jus in bello and jus post bellum Providing detailed historical context as well as addressing modern controversies and topics including drones Islamic jihad and humanitarian intervention the volume will be highly important for students and scholars of the philosophy of war as well as for others interested in contemporary global military and ethical issues

Moral Issues and Christian Responses Patricia Beattie Jung,L. Shannon Jung,2012-09-01 Previously published by Cengage Wadsworth this popular anthology for the study of Christian ethics has been a mainstay of undergraduate courses for nearly thirty years Shannon and Patricia Jung provide an introduction to contemporary moral issues from decidedly yet diverse Christian moral perspectives The anthology intentionally seeks a range of voices to produce a kind of point counterpoint discussion of the ethical issue Among the classic issues considered are sexuality and reproductive rights prejudice biomedical ethics the environment immigration terrorism war and globalization New issues include development ethics personal finance and consumerism workplace ethics health care and citizenship

Military Necessity and Just War Statecraft Eric Patterson,Marc LiVecche,2023-12-19 This book analyzes the concept of military necessity and just war thinking and argues that it should be seen as a vital moral principle for leaders The principle of military necessity is well understood in the manuals of modern militaries and is recognized in the war convention It is the idea that battlefield commanders should make every effort to win on a local battlefield within legal means and using proportionate and discriminating weapons and tactics Every legal textbook on war includes military necessity as a foundational principle within the jus in bello ethics of fighting war alongside principles of proportionality and distinction and it is taught in every Western military academy Even the International Committee of the Red Cross lauds the concept as a cardinal principle of warfare However unlike legal scholarship one can pick up a book by almost any just war thinker in philosophy theology or the social sciences and the concept is missing altogether in their literature This volume returns military necessity to just war thinking and lays out the argument for doing so Each contributor taps into one of the many dimensions of military necessity such as its relationship to jus ad bellum ethics of going to war categories e g right intention its relationship to jus in bello categories or its application in foreign policy and military doctrine Case studies in the book point out the practical moral dimensions of military necessity in cases from the targeted killing of terrorists to battlefield decisions that led to the use of the atomic bomb at Hiroshima This book will be of interest to students of just war theory military ethics statecraft and international relations AIC. ,1944

The Oxford Critical Guide to Tacitus Salvador Bartera,Kelly E. Shannon-Henderson,2025-06-05 The Oxford Critical Guide to Tacitus presents eighteen chapters surveying individual works and books by Tacitus The chapters treat a range of

interpretive issues including Tacitus language and style historical issues literary devices and narrative patterns Differing from other introductions to Tacitus that adopt a thematic approach to his oeuvre as a whole this volume approaches each as a unit from start to finish addressing important interpretive issues relevant to specific texts giving readers a deeper appreciation of their nuances and features Presupposing no prior knowledge of the works or knowledge of Latin these features make the volume an essential resource for those studying Tacitus in translation and the original language for those in classical studies and in other disciplines and for teachers and students both those at the undergraduate level and those at the graduate level

Independence in 21st-Century Popular Music Shannon Garland, Pedro Belchior Nunes, Pedro Roxo, 2025-01-23 Can music be made independently in the 21st century More than a generation of musicians music workers and music companies have now been operating in the context of the profound shifts in music production and dissemination in the digital era Scholarly focus on musical independence has often been centered on genres like punk and indie rooted in the US and UK This volume focused outside the Euro American context shows the variety of ways musicians music workers and businesses manage the economic media and cultural shifts propelled by digitalization asking what it means now to say one is independent It brings together scholars from around the globe who are researching forms of music production circulation consumption and finance that blur the boundaries between the dominant corporate players and independent cultural production With chapters detailing popular music in Argentina Brazil Chile Cuba Indonesia Portugal Spain and Taiwan independence is shown to be a concept and practice simultaneously nebulous contradictory and practical
