Sharia Muslim States And International Human:

Sharia, Muslim States and International Human Rights Treaty Obligations Nisrine Abiad, 2008 This research undertaken from a comparative perspective with a view to identifying any patterns followed by Islamic countries in making declarations and reservations to the main international human rights treaties measures and analyzes to what extent Sharia affects the ratification and implementation of human rights norms by Muslim States An analysis of the various roles of Sharia reveals different approaches in the use of Islamic considerations by Muslim States At an international level Sharia has always been used upon the ratification of international human rights treaties to limit the scope of the State s engagement Internally however some recent examples of legislative amendments and judicial activities demonstrate that Sharia is and can be used to achieve a better translation of human rights norms into domestic practice

International Law and Muslim States
Dawood Hamzah, 2021-08-12 This book analyses the general interaction between international law and Islamic law in the Muslim world today It interrogates factors that often form the root of the tension between the two legal regimes Literalist interpretations of Islamic law and the modern international law s disposition that does not give due consideration to differences among cultures and civilizations are some of these factors This work examines the Saudi Arabia textualist approach to the two primary sources of law in Islam the Qur an and Sunnah and argues that a liberal approach of interpretation has become sine qua non especially now that myriad issues are confronting the Muslim world generally and Saudi Arabia in particular Similarly globalization has generated an unprecedented multi culturalism legal pluralism and trans border interactions in socio economic and political relations Therefore Saudi Arabia as the bastion of Islam and Islamic nations is faced with the imperative of adopting a liberal approach to interpretation of Islamic law with a view to accommodating a wide spectrum of other laws and cultures The book provides a timely examination of the issue of modern Saudi Arabia Islamic legal order vis vis the contemporary concept of international law and international relations in specific areas such as international human rights law and trans national economic matters As such it will be of interest to academics and researchers working in Islamic law international and comparative law human rights law and law and religion

The New Global Law Rafael Domingo, 2010-02-26 The dislocations of the worldwide economic crisis the necessity of a system of global justice to address crimes against humanity and the notorious democratic deficit of international institutions highlight the need for an innovative and truly global legal system one that permits humanity to re order itself according to acknowledged global needs and evolving consciousness A new global law will constitute by itself a genuine legal order and will not be limited to a handful of moral principles that attempt to guide the conduct of the world s peoples If the law of nations served the hegemonic interests of Ancient Rome and international law served those of the European nation state then a new global law will contribute to the common good of all humanity and ideally to the development of durable world peace This volume offers a historical juridical foundation for the development of this new global law

Religious Actors and

International Law Ioana Cismas, 2014 This book assesses whether a new category of actors religious actors has been constructed within international law Religious actors through their interpretations of the religion s they are associated with uphold and promote or indeed may transform potentially oppressive structures or discriminatory patterns This study moves beyond the concern that religious texts and practices may be incompatible with international law to provide an innovative analysis of how religious actors themselves are accountable under international law for the interpretations they choose to put forward The book defines religious actors as comprising religious states international organizations and non state entities that assume the role of interpreting religion and so claim a special legitimacy anchored in tradition or charisma Cutting across the state non state divide this definition allows the full remit of religious bodies to be investigated It analyses the crucial question of whether religious actors do in fact operate under different international legal norms to non religious states international organizations or companies To that end the Holy See Vatican the Organization of Islamic Cooperation and churches and religious organizations under the European Convention on Human Rights regime are examined in detail as case studies The study ultimately establishes that religious actors cannot be seen to form an autonomous legal category under international law they do not enjoy special or exclusive rights nor incur lesser obligations when compared to their respective non religious peers Going forward it concludes that a process of two sided legitimation may be at stake religious actors will need to provide evidence for the legality of their religious interpretations to strengthen their legitimacy and international law itself may benefit from religious actors fostering its legitimacy in different cultural contexts
