OPERATING INSTRUCTIONS cont.

Care & Maintenance

CAUTION: This appliance must be unplugged from the electrical outlet and allowed to cool down before performing any cleaning or maintenance tasks on the unit.

- Let the appliance cool down completely before cleaning or storing.
- Depress the trigger before opening the safety cap in order to release any residual pressure in the boiler.
- Empty all water from the water tank after each use.
- Store in a dry, cool place.
- A periodic rinse of your steam cleaner will free it from deposits. This is recommended every 10-15 tankfuls to free up any scale deposits. Fill the boiler with water and shake vigorously. Tilt the cleaner upside down to empty the boiler of water and any scale deposits.

Cleaning the Angle Concentrator:

Your steamer should not normally require cleaning, however, should you notice a marked decrease in steam output it may be necessary to remove mineral deposit build-up from the angle concentrator orifice.

- First ensure that there is water in the tank. If tank is empty, fill with water, (we recommend using purified or demineralized water), then re-start unit noting whether steam output is normal. If steam output is still low, follow these cleaning instructions:
1. Unplug steam cleaner from wall outlet.
 2. Use a small diameter stiff metal wire such as a straightened metal paperclip and carefully insert the end of the wire into the angle concentrator orifice.
 3. Move wire back and forth several times to remove any deposits.
 4. Reconnect appliance to power outlet, switch on and note steam output.
 5. If steam performance does not improve, repeat steps #1 through #4.

Attaching the Shoulder Strap

Using the detachable shoulder strap allows for greater freedom of movement when both hands are needed for various cleaning tasks. To attach the shoulder strap to the steam cleaner, simply snap the shoulder strap hooks onto the connecting rings on the unit body. When using the steam cleaner with the shoulder strap, avoid rocking or tilting the unit excessively as this may cause water to enter the hose and be discharged along with the steam.
