Rethinking the Future Rowan Gibson, 2011-07-12 The world's foremost business thinkers explore organizations that can be redesigned to survive and thrive in tomorrow's hypercompetitive global environment

Design Studies Audrey Bennett, 2006-08-31 In an age of globalization and connectivity the idea of mainstream culture has become quaint. Websites, magazines, books, and television have all honed in on ever diversifying subcultures hoping to carve out niche audiences that grow savvier and more narrowly sliced by the day. Consequently the discipline of graphic design has undergone a sea change. Where visual communication was once informed by a designer's creative intuition, the proliferation of specialized audiences now calls for more research-based design processes. Designers who ignore research run the risk of becoming mere tools for communication rather than bold voices.

Design Studies a collection of 27 essays from an international cast of top design researchers sets out to mend this schism between research and practice. The texts presented here make a strong argument for performing rigorous experimentation and analysis. Each author outlines methods in which research has aided their design, whether by investigating how senior citizens react to design aesthetics, how hip hop culture can influence design, or how design for Third World nations is affected by cultural differences. Contributors also outline inspired ways in which design educators can teach research methods to their students. Finally, *Design Studies* is rounded out by five annotated bibliographies to further aid designers in their research. This comprehensive reader is the definitive reference for this new direction in graphic design and an essential resource for both students and practitioners.

Rethinking Globalization Bill Bigelow, Bob Peterson, 2002 *Rethinking Globalization* offers an extensive collection of readings and source material on critical global issues.

Competency Web N.P. Rajasekharan, 2002-03 The Competency Web (CW) is an inevitable tool and a process in the context of transformation and change. All organizations require a CW which can have many elements that can be configured for the specific needs of each organization. The author provides the model; it identifies the drivers of competency and focuses on the attitude component which is much talked about but least understood and extremely difficult to introduce and implement.

Sex, Gender and Time in Fiction and Culture B. Davies, J. Funke, 2011-03-01 Investigating modern art, literature, theory, and the law, this book illustrates the different ways in which sex, gender, and time intersect. It demonstrates that time offers new critical perspectives on sex and gender and makes problematic reductive understandings of sexual identity as well as straight and queer time.

The New Global Possible Anil Dasgupta, 2025-09-09 A compelling and hopeful reminder that change is not only within our grasp, it is already happening. Jane Goodall: A must-read for anyone looking for hope and optimism at a critical point in history. John Kerry: Global environmental leader. Anil Dasgupta takes an honest look at lagging climate action and maps out what can be done to rebuild hope for the future. In 2015 world leaders came together in Paris and signed an

agreement to save the planet Ten years later we have made little progress on the ground and the climate crisis is worse than ever We've mostly figured out what we need to do but not how to get it done and time is running out In this groundbreaking new book World Resources Institute President and CEO Ani Dasgupta explores how to orchestrate change at speed and scale How do we get countries to keep working together on climate action when multilateralism is declining How do we harness technological innovation to protect nature rather than destroy it How do we dismantle entrenched power structures and rapidly transition to a clean resilient economy Based on conversations with more than one hundred leaders around the world The New Global Possible weaves together stories of unusual partnerships collaborative leadership and lessons learned from failure Mining the rich history of the climate movement Dasgupta defines the narrow path to a hopeful future one requiring all of our collective focus and determination and offers a radical new practice for orchestrating change for good
