Geology and Geochemistry of Molybdenum Deposits in the Qinling Orogen, P R China YanJing Chen, Franco Pirajno, Nuo Li, XiaoHua Deng, YongFei Yang, 2022-01-01 This book is the first systematic treatise of available data and view points obtained from geological and geochemical studies of the Mo deposits in Qinling Orogen China Qinling Orogen has a minimum reserve of 8.7 Mt Mo ranking the largest molybdenum province both in China and the world Incorporating all known Mo deposit types in the world it presents extensive studies of Mo deposits of world class and unusual types within tectonic settings The Qinling Orogen was finally formed during continental collision between Yangtze and North China cratons following the Triassic closure of the northernmost paleo Tethys It hosts 49 Mo deposits formed in seven mineralization events since 1850 Ma with all the world class deposits being formed during 160–105 Ma coeval with collisional orogeny These deposits are assigned to magmatic and metamorphic hydrothermal classes The magmatic hydrothermal class includes porphyries skarns and intrusion related veins carbonatite fluorite and quartz The porphyry Mo systems in Qinling Orogen are predominated by Dabie type formed in continental collision setting followed by Endako and Climax types formed in continental arcs and rifts respectively The metamorphic hydrothermal Mo deposits are

only reported in Qinling Orogen and thus a new crustal continuum model for the orogenic class mineral systems is proposed. A scientific linkage between ore geology and fluid inclusions is introduced and verified both by theory and case studies. This is the first research book comprehensively displaying continental collision metallogeny. This literature will benefit both Western and Chinese mineral explorers and miners as well as research scientists and students. *The Handbook of Experimental Economics* John H. Kagel, Alvin E. Roth, 2020-05-05. This book which comprises eight chapters presents a comprehensive critical survey of the results and methods of laboratory experiments in economics. The first chapter provides an introduction to experimental economics as a whole with the remaining chapters providing surveys by leading practitioners in areas of economics that have seen a concentration of experiments: public goods, coordination problems, bargaining, industrial organization, asset markets, auctions, and individual decision making. The work aims both to help specialists set an agenda for future research and to provide nonspecialists with a critical review of work completed to date. Its focus is on elucidating the role of experimental studies as a progressive research tool so that wherever possible emphasis is on series of experiments that build on one another. The contributors to the volume: Colin Camerer, Charles A. Holt, John H. Kagel, John O. Ledyard, Jack Ochs, Alvin E. Roth, and Shyam Sunder, adopt a particular methodological point of view: the way to learn how to design and conduct experiments is to consider how good experiments grow organically out of the issues and hypotheses they are designed to investigate.
