Bio-Inspired Materials Ulisses Targino Bezerra, Heber Sivini Ferreira, Normando Perazzo Barbosa, 2019-04-16 Nature
has provided opportunities for scientists to observe patterns in biomaterials which can be imitated when designing
construction materials Materials designed with natural elements can be robust and environment friendly at the same time
Advances in our understanding of biology and materials science coupled with the extensive observation of nature have
stimulated the search for better accommodation compression of materials and the higher organization reduction of
mechanical stress in man made structures Bio Inspired Materials is a collection of topics that explore frontiers in 3 sections
of bio inspired design i bionics design ii bio inspired construction and iii bio materials Chapters in each section address the
most recent advances in our knowledge about the desired and expected relationship between humans and nature and its use
in bio inspired buildings Readers will also be introduced to new concepts relevant to bionics biomimicry and biomimetics
Section i presents research concepts based on information gained from the direct observation of nature and its applications
for human living Section ii is devoted to artificial construction of the Earth This section addresses issues on geopolymers
materials that resemble the structure of soils and natural rocks procedures that reduce damage caused by earthquakes in

natural construction the development of products from vegetable resins and construction principles using bamboo The last section takes a look into the future towards the improvement of human living conditions Bio Inspired Materials offers readers having a background in architecture civil engineering and systems biology a new perspective about sustainable building which is a key part of addressing the environmental concerns of current times
