

[1] GENERAL SPECIFICATIONS

This built-in network scan system realizes a highly efficient document distribution with simple and easy operations.

Major features

The built-in network scan system has the following major functions:

- An integrated solution with a multi-function machine (scanner) and Sharpdesk
- The minimum additional cost allows to use the network scan function.
- Email distribution scan/network device
- Distinct switch among scan, copy, fax, and print job

1. Built-in network scanner

This network scan system is provided with the "Scan and forward" architecture, and sends documents to the following destinations:

- User's desktop and Sharpdesk (by use of FTP)
- Email receiver (by use of SMTP)
- FTP server (by use of FTP)

The scanned data is stored in memory on the printer controller at the SPP's nominal speed, and sent to the planned receiver through the back channel of NIC socket interface.

2. User interface of Sharpdesk and Network Scanner Tool

The first desktop software of this network scan system is Sharpdesk and Network Scanner Tool.

- Sharpdesk includes programs which control and edit image documents, convert into text files by use of OCR, and convert files of different types into one print document.
- Network Scanner Tool includes the FTP server which is provided with a function to monitor reception of scanned data. The icon in the system tray of the desktop of Windows 95/98/NT/Me/2000 indicates this application. When a new file is detected in the directory, this application sends a command to Sharpdesk to get started and process the file.
- Data stored by the Network Scanner Tool can be obtained also by the TWAIN UI.

Network Scanner Tool have the interface to specify or select the IP address of the multi-function machine which is to be set by the user on network scan. This interface is used to open the built-in server of the machine with the user's Internet browser.

3. Network scan user interface

The elements of network scanner control should be provided in two different positions as stated below.

A. Control panel of the multi-function machine

Selection of Destination profile is made by the user with the control panel of the multi-function machine.

B. Web master tool

The system administrator and the user make settings of destination profile, email receivers, desktop receivers for the email server, and FTP server, and other items related to administration and installation through the built-in Web server.

These operations are performed with a Web browser.

4. Server software

This system depends on the FTP which is used by the user and the SMTP mail server which is used.

5. System configuration
