Reconfigured to match the clinical reasoning process, this new edition has also been reorganized by region and by joint motion to make it more user friendly, mirroring the process by which an evaluation is conducted in practice. Also included are various appendices to support the transition to practice as well as an At a Glance version of the manual itself. This is an essential manual for both occupational therapy practitioners and students in training. *Occupational Therapy Manual for the Evaluation of Range of Motion and Muscle Strength* Donna Latella, Catherine Meriano, 2003-02-26 This occupational therapy manual instructs students in the use of assessment tools when evaluating the range of motion and strength of clients yet emphasizes the time efficiency required in today's healthcare environment.
