Sea Kayaking covers boat design, kit requirements, paddling skills, health and well being, meteorology, the ocean environment, navigation, communications, conservation and minimal impact camping, conservation, seamanship, electrical, bilge pumps, solar panels, light sources, boat repairs, leadership, risk management, basic safety and survival strategies as well as a brief overview about the history and various types of canoeing. There is also a comprehensive glossary to assist the reader in understanding the terms and concepts discussed in the main text. Woodhouse's work differs from most manuals about sea kayaking in that it is written from the perspective of someone who paddles the Southern Hemisphere. As such the major differences between the two hemispheres, weather patterns, navigation laws and terminology are discussed as well as compared to their Northern Hemisphere counterparts.
