Subramaniam, Dipti P.

Subramaniam, Ruaa Al Juboori, 2025-01-13 The world continues to face multiple ongoing health challenges including outbreaks of vaccine preventable diseases It is well documented that vaccines are one of the safest most effective and cost effective tools available in the prevention and control of infectious diseases At present vaccines prevent 2 3 million deaths a year with a further 1 5 million that could be prevented if for instance factors such as global coverage of vaccinations improved However despite the evident convenience and availability of vaccine services in some locations across the globe vaccine uptake because of vaccine hesitancy remains an ongoing issue In line with this it is therefore crucial to address vaccine hesitancy specifically amongst healthcare workers who are one of the most significant driving forces in protecting and influencing public health Healthcare workers are one of the most trusted sources in providing credible and accurate information on vaccines to the public and as such can heavily influence vaccination decisions In addition healthcare workers are in close contact with vulnerable patients including those who are immunocompromised or have underlying medical and health conditions Therefore ensuring a high vaccination uptake among healthcare workers is crucial in controlling the spread of infectious diseases and promoting vaccine safety amongst vulnerable populations to save lives and help to reduce the burden on public healthcare systems EMT Crash Course with Online Practice Test, 2nd Edition Christopher
