## **Expanding Underground - Knowledge and Passion to Make a Positive Impact on the World** Georgios

Anagnostou, Andreas Benardos, Vassilis P. Marinos, 2023-04-12 Expanding Underground Knowledge and Passion to Make a Positive Impact on the World contains the contributions presented at the ITA AITES World Tunnel Congress 2023 Athens Greece 12-18 May 2023. Tunnels and underground space are a predominant engineering practice that can provide sustainable, cost-efficient and environmentally friendly solutions to the ever-growing needs of modern societies. This underground expansion in more diverse and challenging infrastructure types or to novel underground uses can foster the changes needed. At the same time, the tunneling and underground space community needs to be better prepared and equipped with knowledge, tools and experience to deal with the prevailing conditions to successfully challenge and overcome adversities on this path. The papers in this book aim at contributing to the analysis of challenging conditions, the presentation and dissemination of good practices, the introduction of new concepts, new tools and innovative elements that can help engineers and all stakeholders to reach their end goals. Expanding Underground Knowledge and Passion to Make a Positive Impact on the World covers a wide range of aspects and topics related to the whole chain of the construction and operation of underground structures: Knowledge and Passion to Expand Underground for Sustainability and Resilience; Geological Geotechnical Site Investigation and Ground Characterization; Planning and Designing of Tunnels and Underground Structures; Mechanised Tunnelling and Microtunnelling; Conventional Tunnelling; Drill and Blast Applications; Tunnelling in Challenging Conditions; Case Histories and Lessons Learned; Innovation; Robotics and Automation; BIM; Big Data and Machine Learning Applications in Tunnelling; Safety Risk and Operation of Underground Infrastructure and Contractual Practices; Insurance and Project Management. The book is a must-have reference for all professionals and stakeholders involved in tunneling and underground space development projects. **Research in Education**, 1974 **Objective Advanced.**

*The Michigan Nonprofit Management Manual*, 2003 **Students at Risk of School Failure** José Jesús Gázquez, José Carlos Núñez, 2018-10-18 The main objective of this Research Topic is to determine the conditions that place students at risk of school failure, identifying student and context variables. In spite of the fact that there is currently little doubt about how one learns and how to teach in some countries of the developed world, there is still a high rate of school failure. Although the term school failure is a very complex construct insofar as its causes, consequences and development from the field of educational psychology, the construct student engagement has recently gained special interest in an attempt to deal with the serious problem of school failure. School engagement builds on the anatomy of the student's involvement in school and describes their feelings, behaviors and thoughts about their school experiences. So engagement is an important

component of students school experience with a close relationship to achievement and school failure Children who self set academic goals attend school regularly and on time behave well in class complete their homework and study at home are likely to interact adequately with the school social and physical environments and perform well in school In contrast children who miss school are more likely to display disruptive behaviors in class miss homework frequently exhibit violent behaviors on the playground fail subjects be retained and if the behaviors persist quit school Moreover engagement should also be considered as an important school outcome eliciting more or less supportive reactions from educators For example children who display school engaged behaviors are likely to receive motivational and instructional support from their teachers The opposite may also be true But what makes student engage more or less The relevant literature indicates that personal variables e g sensory motor neurodevelopmental cognitive motivational emotional behavior problems learning difficulties addictions social and or cultural variables e g negative family conditions child abuse cultural deprivation ethnic conditions immigration or school variables e g coexistence at school bullying cyberbullying may concurrently hinder engagement preventing the student from acquiring the learnings in the same conditions as the rest of the classmates
