*Financial Cryptography and Data Security* Roger Dingledine, Philippe Golle, 2009-07-21. This volume contains the proceedings of the 13th International Conference on Financial Cryptography and Data Security held at the Accra Beach Hotel and Resort Barbados February 23-26, 2009. Financial Cryptography and Data Security (FC) is a well-established international forum for research, advanced development, education, exploration, and debate regarding information assurance in the context of finance and commerce. The conference covers all aspects of securing transactions and systems. The goal of FC is to bring security and cryptography researchers and practitioners together with economists, bankers, and policy makers. This year we assembled a vibrant program featuring 21 peer-reviewed research paper presentations, two panels on the economics of information security and on authentication, and a keynote address by David Dagon. Despite a proliferation of security and cryptography venues, FC continues to receive a large number of high-quality submissions. This year we received 91 submissions: 75 full-length papers, 15 short papers, and 1 panel. Each submission was reviewed by at least three reviewers. Following a rigorous selection, ranking, and discussion process, the Program Committee accepted 20 full-length papers, 1 short paper, and 1 panel. The overall acceptance rate was 24%.

*The Assessment and Treatment of Children Who Abuse Animals* Kenneth Shapiro, Mary Lou Randour, Susan Krinsk, Joann L. Wolf, 2013-09-07. Empirical research has clearly demonstrated that animal abuse in childhood is associated with family violence and violent behavior towards humans in general. Such abuse is accordingly of increasing interest within human services and the criminal justice system. This handbook will serve as an ideal resource for therapists in social work, psychology, psychiatry, and allied fields who work with children who have abused animals. It provides step-by-step guidance on how to assess, develop appropriate treatment plans for, and treat children who commit animal abuse based on the AniCare model developed by the Animals and Society Institute. Exercises cover the identification and expression of feelings, the development of empathy, self-management skills, and working with parents. Careful consideration is also paid to the effects of witnessing animal abuse. The theoretical framework is eclectic, encompassing cognitive-behavioral, psychodynamic, and attachment theories. A number of illustrative case studies are included along with excerpts from treatment sessions. Accompanying electronic supplementary material demonstrates role played assessment and treatment and includes workshop presentations of pedagogic material.
