Work in Ancient and Medieval Thought B. van de Hoven, 2023-01-16 The main object of this study is to find out whether the differences between classical and medieval thinking about work occupations and technology are so significant that we are justified in speaking of a real break between Antiquity and the Middle Ages in this connection or whether there is a possible continuity of ideas From a comparative perspective five themes are being researched to shed light on this question In the first two chapters the author looks into the traditional view of negative ideas about work in Antiquity Chapter three subsequently deals with monks and their attitude towards labour In chapter four the place of the so called artes mechanicae in medieval classifications of knowledge is being studied In chapter five we find an analysis of twelfth century sermons and status These three chapters principally deal with the question whether Christianity brought about a change in attitude towards work Monthly Catalogue, United States Public Documents ,1985 Monthly Catalog of United States Government Publications United States.
