Sustainable Communities through Digital Transformation Yusuf Arayici, Niraj Thuraiajah, Bimal Kumar, 2025-04-29 This book brings together cutting edge exploratory research findings to show how a vision for sustainable communities can be enabled by digital transformation. It attempts to apply existing knowledge about digital transformation and sustainable communities and compare, interpret, diagnose and evaluate a variety of digital solutions to ascertain their suitability for the delivery of a more sustainable built environment. Chapters examine a breadth of issues including how digital transformations could provide digital physical working living environments that anticipate emerging lifestyles. Blend digital engagements into the physical engagements within the built environment. Support business and social activity in physical and online venues. Use advanced information and community oriented technologies for efficient management of urban services. Promote sustainability. Express narratives that celebrate the experience of place and community. Leverage transformation of educational systems. Foster linkages between universities and between universities and businesses. Facilitate working relationships among small and large companies. Foster new processes and arrangements for innovation in the built environment. By comparing the key principles of digital transformation with those of sustainable communities, the contributors seek to justify or discount the applicability of digital change for achieving more sustainable communities. The research presented in this book is essential reading for architecture, urban planning, quantity surveying, building surveying, real estate and construction management professionals and academics.

Strategic Integrated Program Delivery Mark Betts, Peter E.D. Love, Derek H.T. Walker, 2024-12-04 This book outlines a cutting edge form of program delivery which the authors term SIP Form or Strategic Integrated Program delivery. Using the Melbourne Level Crossing Removal Program (LXRP) consisting of the removal of 85 dangerous level crossings throughout metropolitan Melbourne including rail station upgrades, signalling and track work and other associated capital works as an exemplar, the book sets out four features that the authors argue define the SIP form concept as follows: The organisation delivers a program of projects many using an IPD contract variant form such as a Project Alliance Agreement (PAA) in Australia and numerous other countries or the Integrated Form of Agreement (IFoA) in North America. The contract form adopted is used and has been strategically designed to accommodate the project's risk and uncertainty profile as is the case with the LXRP. Projects within the program are integrated with some being concurrently delivered with coordination across the projects in a coherent and highly purposeful manner. Projects are not included that do not strategically fit the overall program delivery strategy. There is

a strategy for learning and innovation diffusion across projects concurrently and sequentially Lessons to be learned are learned through designed in governance mechanisms The LXRP is a potentially unique program of projects and the book takes the reader on a journey through this complex program and after giving the background and relevant context covers topics such as strategy governance procurement collaboration program alliance HRM leadership digital innovation continuous improvement community engagement and performance measurement This detailed analysis of such a complex program of projects makes this book essential reading for project managers engineers and advanced students of project delivery and management
